

ASTR 101 Winter Term 2024 Virtual Lab #3

Light in Astronomy

Important Introductory Remarks – Read These First!

1. **Please do not be dismayed by the apparent length of this 'Virtual Lab!'** The actual exercises are relatively straightforward, with the instructions described *in full detail* for your benefit, as part of a *learning exercise*. If you have problems interpreting the steps at any point, you should not hesitate to ask one of the T.A.'s for clarification – that is why we are here.
2. This is not a 'lab' in the usual science-course sense of the word: we don't need (or want!) elaborate write-ups of any sort. ***Your final submission will be very brief and informal indeed.*** You only have to provide simple answers to the very specific questions that are asked here and there as you work through the discussion; moreover, all the questions reappear in summary form on a few pages at the end of the lab, and you only need to fill in and submit the information requested there.
3. Students sometimes insert their responses right into the original document, at the point where each question appears, and re-submit the whole thing for assessment. ***Please do not do that!*** It requires the markers to work their way through many pages to uncover the relatively small amount of information we ask for, just provide the last few pages.

Late Policy

Your submission should be uploaded to the server by the due date and by the hour stipulated on the posted course TimeLine. *We will accept late submissions*; there is no need to email us to ask permission, or to explain why you are late (but we will know that to be the case because each submission is timestamped when it arrives). In general, there is no problem if you submit the occasional Virtual Lab late, but if you are persistent in doing so over and over as the term progresses, you will eventually wind up paying a penalty (in marks). The policy is described in the announcement "VIRTUAL LABS EXPLAINED," posted to the course web page on Jan 19th. Among other things, it's worth noting that labs handed in late may not be marked promptly!

NOTE: those of you with approved accommodations that include extra time do not have to provide that information, as we already have it through Ventus. You will be given the allowed extra time with no penalty.

Academic Integrity

Each lab is intended as a *learning exercise*, so you may feel free to discuss it with a fellow student or with your TA to clarify your understanding. I remind you, however, that it is our expectation, and indeed also a Queen's University requirement under the stipulations about academic integrity, that *the actual work submitted should be entirely your own*. When measurements, plots, or simple calculations are requested, *make your own*, and express the findings and your conclusions in your own words and style. If we find compelling evidence that this expectation has not been maintained, as for example with (near-)duplicate submissions, the offending reports will both be given a zero grade.

Remote Instrumentation and Virtual Laboratories Franco Davoli, Norbert Meyer, Roberto Pugliese, Sandro Zappatore, 2010-03-10 Accessing remote instrumentation worldwide is one of the goals of e Science The task of enabling the execution of complex experiments that involve the use of distributed scientific instruments must be supported by a number of different architectural domains which inter work in a coordinated fashion to provide the necessary functionality These domains embrace the physical instruments the communication network interconnecting the distributed systems the service oriented abstractions and their middleware The Grid paradigm or more generally the Service Oriented Architecture SOA viewed as a tool for the integration of distributed resources plays a significant role not only to manage computational aspects but increasingly as an aggregator of measurement instrumentation and pervasive large scale data acquisition platforms In this context the functionality of a SOA allows managing maintaining and exploiting heterogeneous instrumentation and acquisition devices in a unified way by providing standardized interfaces and common working environments to their users but the peculiar aspects of dealing with real instruments of widely different categories may add new functional requirements to this scenario On the other hand the growing transport capacity of core and access networks allows data transfer at unprecedented speed but new challenges arise from wireless access wireless sensor networks and the traversal of heterogeneous network domains The book focuses on all aspects related to the effective exploitation of remote instrumentation and to the building complex virtual laboratories on top of real devices and infrastructures These include SOA and related middleware high speed networking in support of Grid applications wireless Grids for acquisition devices and sensor networks Quality of Service QoS provisioning for real time control measurement instrumentation and methodology as well as metrology issues in distributed systems

The Solar System Michael A. Seeds, 2007 Helps students use astronomy to understand science and use science to understand what we are Fascinating and engaging this text illustrates the scientific method and guides students to answer these fundamental

questions What are we And how do we know Astronomy: The Human Quest for Understanding Dale A. Ostlie,2022-09-07 Since humans first looked up at the stars astronomy has had a particular ability to stir the imagination and challenge the thinking of scientists and non scientists alike Astronomy The Human Quest for Understanding is an introductory astronomy textbook specifically designed to relate to non science majors across a wide variety of disciplines nurture their curiosity and develop vital science based critical thinking skills This textbook provides an introduction to how science operates in practice and what makes it so successful in uncovering nature s secrets Given that the study of astronomy dates back thousands of years it is the ideal subject for tracing the development of the physical sciences and how our evolving understanding of nature has influenced and been influenced by mathematics philosophy religion geography politics and more This historical approach also illustrates how wrong turns have been taken and how the inherent self correcting nature of science through constant verification and the falsifiability of truly scientific theories ultimately leads us back to a more productive path in our quest for understanding This approach also points out why as a broadly educated citizenry students of all disciplines must understand how scientists arrive at conclusions and how science and technology have become central features of modern society In discussing this fascinating and beautiful universe of which we are a part it is necessary to illustrate the fundamental role that mathematics plays in decoding nature s mysteries Unlike other similar textbooks some basic mathematics is integrated naturally into the text together with interpretive language and supplemented with numerous examples additional tutorials are provided on the book s companion website Astronomy The Human Quest for Understanding leads the reader down the path to our present day understanding of our Solar System stars galaxies and the beginning and evolution of our universe along with profound questions still to be answered in this ancient yet rapidly changing field
