Behavioral Intervention Research Evaluating Implementing:

Behavioral Intervention Research Laura N. Gitlin, Sara Czaja, Sara J. Czaja, 2015-12-07 I applaud this book for providing a much needed overview of the entire behavioral intervention pipeline. It fills a unique niche in its coverage of key theoretical and methodological aspects as well as its case examples and professional development considerations which makes the content accessible and practical for a broad audience. Marcia Ory PhD From the Foreword This unique text provides comprehensive coverage of one of the most neglected yet vitally important areas of public health research: developing, evaluating, and implementing novel behavioral interventions in service and practice settings. Written for Masters and Doctoral level courses as well as novice and expert researchers in this area, the book examines the most critical issues surrounding this form of research in order to maximize the ability of intervention researchers to successfully implement current and future evidence-based protocols in practice settings. Expert contributors embrace key challenges: the complexities of health care delivery, disease management and prevention, rising costs, and changing population demographics in shaping the push toward advancing more efficient and effective behavioral interventions and methodologies. Tackling numerous topics that have been neglected in traditional randomized trial handbooks, methodology texts, and books on dissemination and implementation science, the book addresses ways to develop and advance an intervention, emerging hybrid trial designs, theories, and new models for integrating behavioral interventions with implementation science, recruitment and retention strategies for inclusion of diverse samples, research designs for different stages of intervention development, treatment fidelity models, and measures of novel measurement and analytic strategies, cost analyses, selection of control groups, use of mixed methodology, ethics, and informed consent, technology-based intervention approaches, professional considerations. Abundant case examples from successful behavioral intervention trials, both national and international, illustrate key concepts. Key Features: Includes examples of a wide range of interventions including individuals across the life span and of diverse communities and health systems. Replete with case examples from successful behavioral intervention trials. Presents the challenges of and strategies for advancing behavioral interventions for immediate use in practice. Written by world recognized expert authors and contributors. Provides novel coverage of a great variety of important but previously neglected topics. Handbook of Intervention Science Laura N. Gitlin, Sara J. Czaja, 2025-07-01 *Handbook of Intervention Science* From Design to Implementation discusses multiple approaches for developing and advancing interventions at the individual, family, community, health system, and policy level. The book focuses on creating interventions suitable for diverse populations from racial, ethnic, geographical, and socioeconomic perspectives. Combining best practices with a practical approach, the book enables readers to advance their intervention research. It covers intervention design, data capture in trials, and evaluation. Decision trees help illustrate when to move forward with an implementation relative to the need for further work. Identifies how to develop and advance interventions from design to evaluation, dissemination, and scaling. Focuses on interventions

applicable across diverse populations for individual family community and system wide interventions Provides decision trees for determining when to advance an intervention or adapt an existing one Incorporates technology in data capture randomized delivery pragmatic trials and intervention evaluation Includes case study exemplars that illustrate key concepts for better understanding Contains bulleted key points for understanding and retention of main points **Clinical**
