Accounting 102 Notes

Chapter 6

Key Terms

Conservatism – A business should report the least favorable figures in the financial statements when two or more possible options are presented.

Consistency Principle – A business should use the same accounting methods and procedures from period to period.

Cost of Goods Available for Sale – The total cost spent on inventory that was available to be sold during a period.

Days' Sales in Inventory – Measures the average number of days that inventory is held by a company (365 days / Inventory Turnover)

Disclosure Principle – A business' financial statements must report enough information for outsiders to make knowledgeable decisions about the company.

First-In, First-Out (FIFO) Method – An inventory costing method in which the first costs into the inventory are the first costs out to cost of goods sold. Ending inventory is based on the costs of the most recent purchases.

Inventory Costing Method – A method of approximating the flow of inventory costs in a business that is used to determine the amount of cost of goods sold and ending merchandise inventory.

Inventory Turnover - Measures the number of times a company sells its average level of merchandise inventory during a period. (Costs of Goods Sold / Average Merchandise Inventory)

Last-In, First-Out (LIFO) Method – An inventory costing method in which the last costs into inventory are the first costs out to cost of goods sold. The method leaves the oldest costs – those of beginning inventory and the earliest purchases of the period – in ending inventory.

Lower-of-Cost-or-Market (LCM) Rules – Rules that merchandise inventory should be reported in the financial statements at whichever is lower – its historical cost or its market value.

Materiality Concept – A company must perform strictly proper accounting only for items that are significant to the business's financial situation.

Specific Identification Method – An inventory costing method based on the specific cost of particular units of inventory.

Weighted-Average Method — An inventory costing method based on the weighted-average cost per unit of inventory that is calculated after each purchase. Weighted-average cost per unit is determined by dividing the cost of goods available for sale by the number of units available.
