Race and Public Administration Amanda Rutherford, Kenneth Meier, 2020-02-24 Issues of race permeate virtually every corner of policy creation and implementation in the United States yet theoretically driven research on interactions of policy race and ethnicity rarely offers practical tools that can be readily applied by current and future civil servants private contractors or nonprofit boards Arguing that scholarship can and should inform practice to address issues of equity in public affairs rather than overlook ignore or deny them Race and Public Administration offers a much needed and accessible exploration of current and cutting edge research on race and policy This book evaluates what contradictions unanswered questions and best or worst practices exist in conducting and understanding research that can provide evidence based policy and management guidance to practitioners in the field Individual chapters are written by established and emerging scholars and explore a wide range of policy areas including public education policing health and access to healthcare digital governance nonprofit diversity and international contexts Together the chapters serve as a link between theoretically informed research in public administration and those students and professionals trained to work in the trenches of public administration This book is ideally suited as a text for courses in schools of public administration public policy or nonprofit management and is required reading for those actively involved in policy analysis creation or evaluation Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
