**Abstract:** Assessing teachers' beliefs and efficacy in adopting pedagogical strategies supporting multilingual learners is imperative as linguistic diversity continues to grow in the twenty-first-century classroom. Teachers differentiating their instruction can address the needs of multilingual learners and produce better learner motivation and outcomes. However, local and international studies investigating teachers' beliefs and efficacy in practicing differentiated instruction (DI) in a multilingual setting are scarce. Thus, this study intends to determine preservice English teachers' teaching beliefs and efficacy when differentiating instruction for multilingual students. Findings from a survey questionnaire adapted from previous related studies and administered to 164 preservice English teachers of a Teacher Education Institution (TEI) enrolled as respondents/participants in the present study revealed their positive beliefs and high self-efficacy toward practicing DI in order to support linguistically diverse students. Furthermore, the findings from study's attempt to determine whether a significant relationship existed between teaching beliefs and efficacy showed a significant correlation between them. Although findings showed respondents' good disposition toward DI practices in general, there is still scope for improving TEI curriculum through corpus-based studies to determine and work on areas needing development and impart continuous training in order for teaching professionals to enhance their skills in DI practice in multilingual classrooms.

### Introduction

Classrooms are becoming more multilingual (Tomlinson 2004). In mainstream classrooms worldwide, many students cannot speak the predominant language (Milani 2007; Durgunoğlu and Hughes 2010). This proves the prevalence of learners with different linguistic backgrounds, often referred to as isolated English language learners (ELLs) (Durgunoğlu and Hughes 2010). Dack (2019b) stated that schools must implement measures to cater to and support the fulfillment of the unique needs of such students, which requires teachers to possess complex skills such as analyzing individual student needs, designing flexible learning activities, instructional approaches, and assessments and continuous evaluation of assessment strategies. It goes alongside creating and maintaining a positive

Emotions in Reading, Learning, and Communication Catherine Bohn-Gettler, Johanna Kaakinen, 2024-08-16 This book brings together experts engaging in empirical studies on how emotion influences learning and processing for varying text types in different contexts In our current era learners are confronted with many and varying sources of information such as news media books websites social media scientific articles communicative interactions and more In addition individuals must

learn from such sources making it important to critically examine the factors underlying learning from text and discourse. Importantly, the valence, pleasantness, and activation intensity of learners' emotions can influence the quality of processing, which could help or hinder the learner's ability to understand and learn from text. The chapters included in this book work toward developing a more comprehensive understanding of the influence of emotions in supporting learning, comprehension, processing, and conceptual change to draw important connections to the broader fields of text and discourse learning and motivation. This is an important and illuminating read for students and scholars of psychology, education, and educational technology. The chapters in this book were originally published as a special issue of *Discourse Processes*.

**Handbook of Epistemic Cognition** Jeffrey A. Greene, William A. Sandoval, Ivar Bråten, 2016-01-22. The *Handbook of Epistemic Cognition* brings together leading work from across disciplines to provide a comprehensive overview of an increasingly important topic: how people acquire, understand, justify, change, and use knowledge in formal and informal contexts. Research into inquiry, understanding, and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert-like conceptualizations, skills, and performance. Outside of academic domains, issues of who and what to believe and how to integrate multiple sources of information into coherent and useful knowledge have arisen as primary challenges of the 21st century. In six sections, scholars write within and across fields to focus and advance the role of epistemic cognition in education. With special attention to how researchers across disciplines can communicate and collaborate more effectively, this book will be an invaluable resource for anyone interested in the future of knowledge and knowing. Dr. Jeffrey A. Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill. Dr. William A. Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education and Information Studies. Dr. Ivar Bråten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo, Norway.

**Handbook of Individual Differences in Reading** Peter Afflerbach, 2015-08-11. The central unifying theme of this state-of-the-art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading. Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences. Addressing developments in each of these areas, this volume also describes affective individual differences and the environments in which individual differences in reading may emerge, operate, interact, and change. The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today: the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed. An important contribution of this volume is to provide *prima facie* evidence of the benefits of broad conceptualization of the ways in which readers differ. The *Handbook of Individual Differences in Reading* moves the

field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area
