Tools and Algorithms for the Construction and Analysis of Systems Ed Brinksma,1997-03-20 This book constitutes the refereed proceedings of the Third International Workshop on Tools and Algorithms for the Construction and Analysis of Systems TACAS 97 held in Enschede The Netherlands in April 1997 The book presents 20 revised full papers and 5 tool demonstrations carefully selected out of 54 submissions also included are two extended abstracts and a full paper corresponding to invited talks The papers are organized in topical sections on space reduction techniques tool demonstrations logical techniques verification support specification and analysis and theorem proving model checking and applications

Coloured Petri Nets Kurt Jensen,2012-12-06 The contents of this volume are application oriented The volume contains a detailed presentation of 19 applications of CP nets covering a broad range of application areas Most of the projects have been carried out in an industrial setting The volume presents the most important ideas and experiences from the projects in a way which is useful also for readers who do not yet have personal experience with the construction and analysis of large CPN models The volume demonstrates the feasibility of using CP nets and the CPN tools for industrial projects The presentation of the projects is based upon material provided by the persons who have accomplished the individual projects At the beginning of each chapter we list their names and we say where the original material has been published The original material often contains more elaborate information e g about details of the modelled system and related work I have edited the material provided by the original authors I have modified some of the CP nets e g to improve the layout and use more mnemonic names In some cases I have also changed a few net components e g merged two transitions or introduced a Standard ML function for operations that are used in many arc expressions These modifications make the CP nets more appropriate as study material but they do not change the essential behaviour of the CPN models
