Mind from Body Don M. Tucker, 2007-06-25 In Mind from Body Don Tucker one of the most original thinkers about organic information processing provides a fascinating analysis of how our brains have become what they are today and speculates intriguingly about what they could be tomorrow He presents important research that explains how personal experience creates the emotional and motivational bases of each of our thoughts even though we are usually not aware that it is happening Tucker shows that in exploring how these bodily thought processes still determine how we react to the world and make decisions we can become more rational Guide to Programs National Science Foundation (U.S.), 1992
