Birds Of Missouri Their Distribution And Abundance:

Birds of Missouri Mark B. Robbins, David A. Easterla, 1992 Robbins and Easterla offer the most comprehensive treatment of the birds recorded in Missouri since Otto Widmann's landmark publication at the turn of the century. *Birds of Missouri* couples an exhaustive literature review with much unpublished information to present a historical perspective as well as an up to date assessment of each species recorded in the state. Publishers website [A Naturalist's Guide to the Great Plains](#) Paul A. Johnsgard, 2018 This book documents nearly 500 US and Canadian locations where wildlife refuges, nature preserves and similar properties protect natural sites that lie within the North American Great Plains from Canada's Prairie Provinces to the Texas-Mexico border. Information on site location, size, biological diversity and the presence of especially rare or interesting flora and fauna are mentioned, as well as driving directions, mailing addresses and phone numbers or internet addresses as available. US federal sites include 11 national grasslands, 13 national parks, 16 national monuments and more than 70 national wildlife refuges. State properties include nearly 100 state parks and wildlife management areas. Also included are about 60 national and provincial parks, national wildlife areas and migratory bird sanctuaries in Canada's Prairie Provinces. Many public access properties owned by counties, towns and private organizations are also described.

Ammodramus Henslowii Dirk E. Burhans, 2002 *Golden-winged Warbler Ecology, Conservation, and Habitat Management* Henry M. Streby, David E. Andersen, David Buehler, 2016-10-26 Golden-winged Warblers (*Vermivora chrysoptera*) are migratory songbirds that breed in temperate North America primarily in the Great Lakes region with remnant populations throughout the Appalachian Mountains and winter in Central and northern South America. Their breeding range has contracted dramatically in the Appalachian Mountains and many populations have dramatically declined, likely due to habitat loss, competition and interbreeding with Blue-winged Warblers (*Vermivora pinus*) and global climate change. As a result of population declines in much of the eastern portion of their breeding range, Golden-winged Warblers are listed as endangered or threatened in 10 US states and in Canada and have been petitioned for protection under the US Endangered Species Act. Published in collaboration with and on behalf of The American Ornithological Society, this volume in the highly regarded *Studies in Avian Biology* series compiles extensive current research on Golden-winged Warblers and summarizes what is known and identifies many remaining unknowns, providing a wealth of peer-reviewed science on which future research and listing decisions can be based.

Birds of the Central Platte River Valley and Adjacent Counties Paul A. Johnsgard, Mary Bomberger Brown, 2013-03-01 The central Platte River Valley region of Nebraska is described ecologically and defined as encompassing 11 counties and nearly 10,000 square miles and extending about 120 miles from the western edge of Lincoln County to the eastern edge of Merrick County. At its center is the Platte River, the historic spring staging area for Sandhill and Whooping cranes, five species of geese and millions of waterfowl and water-dependent birds, in addition to

providing the breeding habitats for more than 100 other bird species Collectively at least 373 bird species have been reported from the Central Platte Valley making it the most species rich bird location in Nebraska and of the most species diverse regions in the Great Plains The abundance distribution and habitats of these species are summarized with special consideration given to the Valley s three nationally threatened and endangered birds the Whooping Crane Interior Least Tern and Piping Plover and the now probably extinct Eskimo Curlew Also included are a species checklist a list of 82 regional birding sites and a bibliography of 130 citations

Birds of the Salton Sea Michael Patten, Guy McCaskie, Philip Unitt, 2003-08-19 The Salton Sea California s largest inland lake supports a spectacular bird population that is among the most concentrated and most diverse in the world Sadly this crucial stopover along the Pacific Flyway for migratory and wintering shorebirds landbirds and waterfowl is dangerously close to collapse from several environmental threats This book is the first thoroughly detailed book to describe the birds of Salton Sea more than 450 species and subspecies in all A major contribution to our knowledge about the birds of western North America it will also be an important tool in the struggle to save this highly endangered area Synthesizing data from many sources including observations from their long term work in the area the authors species accounts discuss each bird s abundance seasonal status movement patterns biogeographic affinities habitat associations and more This valuable reference also includes general information on the region s fascinating history and biogeography making it an unparalleled resource for the birding community for wildlife managers and for conservation biologists concerned with one of the most threatened ecosystems in western North America

Prairie Birds Paul A. Johnsgard, 2001 Johnsgard provides an overview of the history current status and uncertain future of prairie birds from falcons and shorebirds to larks and sparrows Some are intercontinental migrants that winter in South America others sedentary species or short distance travelers that may frequent the grasslands of Mexico Johnsgard describes each species its features habits habitats migratory patterns and breeding season ecology
