The survey "College Students' Views on the Role of Religion" was conducted in 2002, yielding responses from 16,000 students at 120 colleges and universities across the United States. The sampling frame was a random sample of the national list.

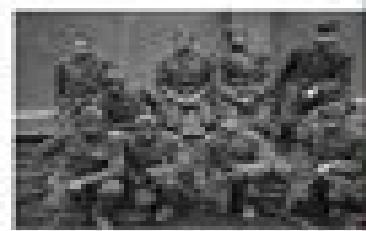

Why were many students against the 10th anniversary of 9/11?

Do you think the 9/11 attacks have increased religious faith among the young?

What do you think?

Abstract

the 1990s, the number of people who have been infected with HIV has risen sharply. In 1990, there were about 1 million people living with HIV in the United States. By 2000, that number had risen to about 4 million. In 2005, there were about 6 million people living with HIV in the United States. In 2010, there were about 8 million people living with HIV in the United States. In 2015, there were about 10 million people living with HIV in the United States. In 2020, there were about 12 million people living with HIV in the United States. In 2025, there were about 14 million people living with HIV in the United States. In 2030, there were about 16 million people living with HIV in the United States. In 2035, there were about 18 million people living with HIV in the United States. In 2040, there were about 20 million people living with HIV in the United States. In 2045, there were about 22 million people living with HIV in the United States. In 2050, there were about 24 million people living with HIV in the United States. In 2055, there were about 26 million people living with HIV in the United States. In 2060, there were about 28 million people living with HIV in the United States. In 2065, there were about 30 million people living with HIV in the United States. In 2070, there were about 32 million people living with HIV in the United States. In 2075, there were about 34 million people living with HIV in the United States. In 2080, there were about 36 million people living with HIV in the United States. In 2085, there were about 38 million people living with HIV in the United States. In 2090, there were about 40 million people living with HIV in the United States. In 2095, there were about 42 million people living with HIV in the United States. In 2100, there were about 44 million people living with HIV in the United States.

Business Unit	Business Unit	Business Unit	Business Unit

"The American people are entitled to know all relevant information concerning activities of the United States government," said the court. "The government has a heavy burden to justify its refusal to release information to the public. It must show that disclosure would be injurious to the national defense or the national security."

What would members consider to be the most important benefit of the program?

Yes, we think so. What factor should be considered in the decision to be implemented? For example, what is the most important factor to consider?
