→ **The Carbon Cycle** : The carbon cycle is the pathway that carbon follows as it moves in and out of living organisms.

All living things are partially made of carbon. Where does this carbon come from? Is carbon, "created" daily? Actually- it is NOT. All the carbon atoms that are in your body are simply recycled carbon atoms from the beginning of earth's history! That means that the carbon atoms that are in your body right now have been in some other, organism's body in the past. Just think, a carbon atom in your eyeball could have been in a dinosaur's poop!

Complete the following animations:
