

Biology Exam 1 Study Guide

Lecture 1 → Introduction to Biological Science

Tree of Life

- Domains
 - Eukarya → visible life
 - Split into animals and plants
 - Very small portion
 - Bacteria → single cell
 - Make up most of life's branches
 - Symbionts that evolved into mitochondria and chloroplasts were eubacteria
 - Archaea → original domain of life
 - More closely related to eukaryotes than eubacteria, first branch of life
 - Basic split between archaea and bacteria
- Candidate phyla radiation: Single species have been identified, each identifies an entire phylum which is yet to be understood - pioneer species (tree is dominated by new species that scientists have never seen before)
- Species disappearing faster than can be recovered
- Eukaryotes and archaea are most closely related branches

Destruction and Mass Extinction

- One million species face imminent extinction because of humans
- Recent past → >50% vertebrates/>75% flying insects lost in the past <50 years
- Critically threatened → >40% amphibians, >30% plants/corals/sharks, >25% mammals
- Populations and extinctions have increased

Theory of Evolution

- Evolution: all life on earth evolved from a common ancestor, most properties within cells work in the same way, the change in gene distribution over time within a population
- Theory: a very well substantiated idea that explains many overlapping phenomena at once, wide-ranging, strongest. Not a hypothesis
- Darwin: species arise through random mutation and natural selection for fitness
- Evidence (fewer than 40% of Americans believe in evolution)
 - fossil record shows conservation of homologous structures
 - Molecular proof: same DNA and RNA protein in cells
 - Homologous function in hands and fins → evolved similar mechanisms in appendages
- Scopes Monkey Trial
 - Scopes taught evolution illegally; resulted in Butler Act → forbid teaching evolution in TN
- Endosymbiont theory
 - Single composite cell of greater complexity could evolve from two or more separate simpler living cells in a symbiotic relationship

Year of Earth's History

- 1 Jan: earth formed 4.54 bya by acceleration of material from the solar nebula via gravitational collapse, conditions were incompatible with life, bombarded with asteroid-sized meteors for 800 million years
- 4 Mar: by 3.8 bya bombardment had slowed, Earth had cooled to lower the temps "compatible" with life

Biology 1 Study Guide Answers Biology Junction

Kathryn L. McCance, Sue E. Huether

Biology 1 Study Guide Answers Biology Junction:

Study Guide for Pathophysiology - E-Book Kathryn L. McCance, Sue E. Huether, 2015-04-01 Master the content from your textbook with this helpful study tool Corresponding to the chapters in Pathophysiology The Biologic Basis for Disease in Adults and Children 7th Edition by Kathryn McCance and Sue Huether this study guide offers practical activities to help you review and remember basic pathophysiology Interactive questions make it easier to understand disease etiology and disease processes and help you apply your knowledge to clinical practice 43 case scenarios provide real world examples showing how you can apply and integrate knowledge Answer key may be found in the back of the study guide allowing you to check your answers and evaluate your progress UPDATED More than 2 650 questions include question types such as Match these Definitions Choose the Correct Words Complete these Sentences Categorize these Clinical Examples Explain the Pictures Describe the Difference Teach these People about Pathophysiology and many more NEW An interactive format is used for all questions helping you to understand and master the content not just memorize the key facts NEW Teach these People about Pathophysiology questions challenge you to answer questions that patients might ask in real life practice NEW Nearly 70 illustrations from McCance and Huether's Pathophysiology textbook are used in selected question types **Study Guide for Psychology in Everyday Life** David G.
