Rigvedic Formulas and Meter Urban Lindqvist, 2015-04-01 The book starts with a rundown on

Rigvedic meter including a discussion of irregularities and the importance of word boundary patterns with a brief digression on clitics This is followed by a discussion of formulas formulaic diction and various definitions of the concept of formula in oral poetic traditions resulting in the relativistic but more realistic definition a formula is a slice of a formulaic continuum i e a razor sharp definition is in conflict with the material it is supposed to define The metrical facts show that irregular dimeters in the Rigveda are more closely related to regular trimeters than to regular dimeters Still Bloomfield's extraction hypothesis does not provide a sufficient methodological basis for explaining the irregular dimeters nor does the laryngealist approach A selection of irregular dimeter lines are examined with reference to the formulaic continua and associative networks surrounding them and an attempt is made to show how these continua helped trigger the use of certain words in certain metrical positions

Recent Trends In Applied Systems Research 1995, 1995 **Expert Systems** Cornelius T.

Leondes, 2001-09-26 This six volume set presents cutting edge advances and applications of expert systems Because expert systems combine the expertise of engineers computer scientists and computer programmers each group will benefit from buying this important reference work An expert system is a knowledge based computer system that emulates the decision making ability of a human expert The primary role of the expert system is to perform appropriate functions under the close supervision of the human whose work is supported by that expert system In the reverse this same expert system can monitor and double check the human in the performance of a task Human computer interaction in our highly complex world requires the development of a wide array of expert systems Expert systems techniques and applications are presented for a diverse array of topics including Experimental design and decision support The integration of machine learning with knowledge acquisition for the design of expert systems Process planning in design and manufacturing systems and process control applications Knowledge discovery in large scale knowledge bases Robotic systems Geographic information systems Image analysis recognition and interpretation Cellular automata methods for pattern recognition Real time fault tolerant control systems CAD based vision systems in pattern matching processes Financial systems Agricultural applications Medical diagnosis
