Population-Based Approaches to the Resource-Constrained and Discrete-Continuous Scheduling Ewa Ratajczak-Ropel, Aleksander Skakovski, 2017-08-21 This book addresses two of the most difficult and computationally intractable classes of problems discrete resource constrained scheduling and discrete continuous scheduling The first part of the book discusses problems belonging to the first class while the second part deals with problems belonging to the second class Both parts together offer valuable insights into the

possibility of implementing modern techniques and tools with a view to obtaining high quality solutions to practical and at the same time computationally difficult problems. It offers a valuable source of information for practitioners dealing with the real world scheduling problems in industry management and administration. The authors have been working on the respective problems for the last decade, gaining scientific recognition through publications and active participation in the international scientific conferences, and their results are obtained using population based methods. Dr E Ratajczk Ropel explores multiple agent and A Team concepts while Dr A Skakovski focuses on evolutionary algorithms with a particular focus on the population learning paradigm.

Twelfth Scandinavian Conference on Artificial Intelligence M. Jaeger, T.D. Nielsen, P. Viappiani, 2013-11-14. Artificial intelligence has become so much a part of everyday life that it is now hard to imagine a world without it. This book presents papers from the 12th Scandinavian Conference on Artificial Intelligence SCAI held in Aalborg, Denmark, in November 2013. The SCAI conference is the main biennial platform for the AI research community in Scandinavia, and the papers collected here not only include contributions from Scandinavia but also from other European and non-European countries. Topics cover the entire range of AI with a particular focus on machine learning and knowledge representation as well as uncertainty in AI and applications. In addition to the 28 regular papers, extended abstracts of the presentations made by Ph.D. students of their research in progress to a panel of experts in the doctoral symposium, a new feature at this conference is also included here. This book will be of interest to all those who wish to keep up to date with the latest developments in artificial intelligence.
