Angiogenesis and Direct Myocardial Revascularization Roger J. Laham, Donald S. Baim, 2007-11-05 An interdisciplinary panel of pioneers and opinion leaders review the basic preclinical clinical and developmental pathways to new treatment strategies such as therapeutic angiogenesis and myogenesis The authors take advantage of new biological understanding novel therapeutic targets multiple available and well studied therapeutic strategies and the necessary imaging techniques to measure outcomes Their in depth discussions cover the identification of new therapeutic targets and pathways the investigation of transcriptional factors master switch molecules cell based approaches chemokines a better understanding of the effects of aging endothelial dysfunction and hypercholesterolemia in response to angiogenic stimuli Highlights include examination of drug delivery problems outcomes measure stem therapy high risk interventions development pathways and future possibilities *Handbook of Complex Percutaneous Carotid Intervention* Jacqueline Saw, Jose Exaire, David S. Lee, Sanjay Yadav, 2008-08-17 This handbook supplements hands on training in interventional cardiology with a specific focus on percutaneous intervention in patients with extracranial carotid artery stenosis It carries reviews of landmark studies supporting carotid endarterectomy and stenting and is a comprehensive guide to this exciting and burgeoning field

Stem Cells and Myocardial Regeneration Marc S. Penn, 2007-11-06 Over the past 5 years there has been great excitement and controversy in the scientific financial and lay literature for the potential of stem cell based strategies for the prevention and treatment of chronic heart failure CHF Not that long ago we believed we were born with a set number of cardiac myocytes and that once damaged there was no hope to replace them The interest in the field stems from the magnitude of cardiovascular disease in the world Our ability to treat and help patients survive acute myocardial infarction MI has resulted in a near epidemic of CHF There are more than 5 million Americans who currently carry the diagnosis of CHF With more than 1 million MIs a year in the United States there are approx 500 000 new cases of CHF diagnosed each year The goal of Stem Cells and Myocardial Regeneration is to present in a coherent manner the current state of knowledge of stem cell based therapies for cardiac dysfunction including current findings in both the laboratory and the clinic trials The first section of this Stem Cells and Myocardial Regeneration focuses on the magnitude of the problem and the successes and failures of what we consider optimal medical therapy It is on this background that stem cell based therapy needs to build

Cardiac Rehabilitation William Kraus, Steven Keteyian, 2007-06-15 The era of cardiac rehabilitation in the United States dates back at least thirty years when Herman Hellerstein at Case Western Reserve Andy Wallace at Duke and Ken Cooper in Dallas envisioned that a comprehensive lifestyle approach to the rehabilitation and prevention of patients having had a cardiac event would potentially yield great benefits for the individual patient and the health care system Until that time the thought of vigorous exercise in the cardiac patient soon after an event was close to anathema One of us WEK was introduced to Herman Hellerstein in Cleveland in the late 1960 s when his father sought medical opinion from

him for a cardiac condition WEK was introduced to Andy Wallace in 1979 by which time the latter had started a multidisciplinary geographically regional cardiac rehabilitation program at Duke based upon consultations with Hellerstein and Cooper By then cardiac rehabilitation was progressing beyond the vision of exercise only and since then the concept of cardiac rehabilitation has grown into the comprehensive multidisciplinary program that we know today and that we attempt to describe in this volume The practice of cardiac rehabilitation has grown and metamorphosed in the last thirty years in parallel with the growth and metamorphosis of the practice of cardiovascular medicine During the formative stages of cardiac rehabilitation the use of coronary care units was in its infancy The coronary artery bypass operation was less than ten years old The LIMA bypass had not been invented

Interventional Cardiology Howard C. Herrmann, 2007-10-28 A comprehensive survey of nonsurgical treatment for a variety of heart diseases that affect the cardiac valves the heart muscle and the structure of the heart The authors describe who these procedures are useful for how to do them and how well they work Major topics of discussion include percutaneous techniques for valvular heart disease septal defects at both the atrial and ventricular levels adjunctive therapies during coronary interventions and angioplasty to treat extracardiac vascular disease as well as reviews of the cutting edge imaging modalities now being used in interventional procedures An accompanying CD ROM contains video demonstrations of catheterization and the imaging portions of these procedures

Essentials of Restenosis Henricus J. Duckers, Elizabeth G. Nabel, Patrick W. Serruys, 2007-11-13 Leading interventional cardiologists including Patrick Serruys Eric Topol David Holmes Thomas Luscher and others provide the gold standard reference on the treatment of restenosis coronary artery blockage for interventional cardiologists Dr Serruys who pioneered the use of drug eluting stents and other pioneers in the field cover everything from non invasive imaging to eluting stents to brachytherapy through to the latest molecular biology based treatments including antisense stem cells and gene therapy making this an essential reference for all interventional cardiologists

Cardiovascular Magnetic Resonance Imaging Raymond Y. Kwong, 2008-03-19 Cardiac Magnetic Resonance Imaging CMR is a rapidly evolving tool This book presents a state of the art compilation of expert contributions to the field each examining normal and pathologic anatomy of the cardiovascular system as assessed by magnetic resonance imaging Functional techniques such as myocardial perfusion imaging and assessment of flow velocity are emphasized The book represents a multi disciplinary approach to the field

Nuclear Cardiology, The Basics Frans J Th Wackers, Wendy Bruni, Barry Zaret, 2007-12-26 The purpose of this updated book is to provide the outline for the nuts and bolts establishment and operation of a nuclear cardiology laboratory In so doing the authors have attempted to deal with the relevant issues that a laboratory director must address in either setting up the laboratory or maintaining its competitive edge and clinical competence over time The authors primarily attempted to identify issues related to outpatient imaging facilities However where appropriate issues related to inpatients in hospital based laboratories are also discussed In this new edition the authors have kept the basic format established in the first

edition In addition to reviewing modifying and updating each chapter in the first edition they have added entirely new chapters on PET imaging hybrid imaging and the clinical appropriateness of nuclear cardiology procedures Preventive Cardiology Jo Anne Micale Foody,2007-11-03 Preventive cardiology is a fast moving field that places emphasis on the prevention and treatment of coronary disease Preventive Cardiology Insights Into the Prevention and Treatment of Cardiovascular Disease Second Edition is intended for clinical cardio gists internists primary care providers and allied health care professionals who wish to extend their knowledge and expertise in the rapidly expanding field of preventive car ology It is the mission of this book to provide clinicians with the understanding and tools necessary to implement prevention in their daily practices Recent changes in the delivery of health care in the United States and abroad in conjunction with new scientific evidence supporting the role of preventive strategies in the maintenance of cardiovascular health have focused new attention and efforts on the field of cardiovascular disease prevention The field of cardiology is thus making a gradual transition from the technology driven intervention oriented perspective of the last several decades to a new preventive molecular based perspective As fresh evidence amasses that preventive measures produce a considerable decrease in the incidence of both primary and secondary cardiac events and mortality there is growing widespread acknowledgment that health care providers from all arenas must initiate preventive str egies in the management and care of their patients

Heart Disease Diagnosis and Therapy M. Gabriel Khan,2007-10-27 M Gabriel Khan MD concisely assembles in a reader friendly format all the clinically useful information that an internist needs in both his daily rounds and abusy office practice to find correct clinical diagnoses and choose optimal pharmacologic therapies for their patients Highlights include a simplified method for recognition of and a practical therapeutic approach to arrhythmias as well as a more logical approach to drug management of hypertension than that given by the Joint National Committee instructive algorithms that simplify the diagnosis and treatment of syncope and extensive diagnostic information on hypertrophic cardiomyopathy A large number of illustrative electrocardiograms that help to clarify the most often misinterpreted of all cardiologic tests and extensive discussions of practical cardiovascular pharmacology complete this magisterial survey
