Animal Welfare Limping Towards Eden:

Animal Welfare: Limping Towards Eden John Webster, 2008-04-15 There has been a recent explosion of active concern in matters of animal welfare. The science behind animal welfare has progressed significantly. New codes of practice and legislation have come into being and innovative methods to assess welfare schemes for food production have emerged. Part of a major animal welfare series. *Animal Welfare Limping Towards Eden* is John Webster's new and groundbreaking work on animal welfare. Building on his first book, the highly acclaimed *Animal Welfare: A Cool Eye Towards Eden*, it not only critically reviews areas of development but looks to how animal welfare can be improved in the future. Special consideration is given to defining animal welfare, fit and happy, and establishing a systematic approach for its evaluation: the five freedoms. Providing a sound ethical framework that affords proper respect to animals within the broader context of our duties as citizens to the welfare of society. Developing comprehensive, robust protocols for assessing animal welfare and the provisions that constitute good husbandry. Introducing an education policy that will increase human awareness of animal welfare problems and promote action to reduce suffering. This book is part of the UFAW Wiley Blackwell Animal Welfare Book Series. This major series of books produced in collaboration between UFAW, The Universities Federation for Animal Welfare and Wiley Blackwell provides an authoritative source of information on worldwide developments, current thinking and best practice in the field of animal welfare science and technology. For details of all of the titles in the series see <http://www.wiley.com/go/ufaw> or www.wiley.com/go/ufaw.

Teaching the Animal , Teaching the Animal: The Social Sciences , Animals, Ethics and Trade Joyce D'Silva, Jacky Turner, 2012-05-16 Modern urban life cuts us off from direct connection with the animal world yet daily the lives of millions of animals are affected by what we consume and wear and what we trade in The use of animals for food labour and pleasure pursuits has long been justified with the assumption that unlike humans animals aren t fully sentient beings In recent years however science has revealed an astonishing array of complex animal behaviour and scientists and policy makers now accept that the animals we make use of are indeed conscious with preferences and intentions The implications for our culture of factory farming fast food and rainforest liquidation are staggering In this powerful book internationally renowned experts on animal behaviour and agriculture such as Jane Goodall Tim Lang and Vandana Shiva are brought together with ethicists religious scholars international industry and regulators for

the first time to debate these critical issues and tackle the profound implications of animal sentience The first sections discuss scientific and ethical perspectives on the consciousness emotions and mental abilities of animals Later sections address how human activities such as science law religion farming food production trade development and education respect or ignore animals sentience and welfare and review the options for changes in our policies our practices and our thinking The result is nothing less than a stark and necessary look into the heart of humanity and the ethics that govern our animal powered society

Animal Husbandry Regained John Webster, 2013 The farming of animals for meat and milk confronts a stark dilemma While world demand from a growing and more affluent human population is increasing rapidly there are strong counter arguments that we should eat less meat and pay more attention to environmental protection animal welfare and human health and well being The aim of this book is to identify and explain the causes and contributors to current problems in animal husbandry especially those related to factory farming and advance arguments that may contribute to its successful re orientation Husbandry is considered in its broadest sense namely the productive and sustainable use of the land for the good of all plants humans and other animals The first part of the book outlines principles and arguments necessary to engage with current problems depletion of natural resources and destruction of environment animal welfare food and health fair trade and sharing resources These arguments are illustrated by examples and sufficient evidence to justify the argument without obscuring the message The second part presents a series of constructive proposals for change and development in animal husbandry both in the developed world and subsistence agriculture These include more integrated crop and livestock farming systems the ethics of animal welfare and environmental management and the evolution of a new social contract whereby the rights of the people to a fair share of good safe food and a green and pleasant land are matched by a shared responsibility to preserve these things
