Harnessing the Power of Technology to Improve Lives Luc de

Witte,2017-09-15 The lives of people with disabilities are complex and various and there are many situations where technology particularly assistive technology already makes a real difference It is clear that smart phone and tablet computer based solutions continue to enhance the independence of many users but it is also important that more traditional assistive technologies and services are not forgotten or neglected This book presents the proceedings of the 14th conference of the Association for the Advancement of Assistive Technology in Europe AAATE 2017 entitled Harnessing the power of technology to improve lives held in Sheffield UK in September 2017 This 4 day event about assistive technologies AT highlights the association s interest in innovating not only technology but also services and addresses the global challenge of meeting the needs of the increasing number of people who could benefit from assistive technology The 200 papers in the book are grouped under 30 subject headings and include contributions on a wide range of topical subjects including aging well and dementia care robotics eHealth and apps innovations universal design sport and disordered speech The breadth of the

AAATE conference reflects people's life needs and so the book is sure to contain something of interest to all those whose work involves the design development and use of assistive technology whatever the situation. The photo on the front cover illustrates the breadth of assistive technologies that can improve lives. Photographer Simon Butler. *Intelligent Systems and Applications in Computer Vision* Nitin Mittal, Amit Kant Pandit, Mohamed Abouhawwash, Shubham Mahajan, 2023-11-02. The book comprehensively covers a wide range of evolutionary computer vision methods and applications: feature selection and extraction for training and classification; metaheuristic algorithms in image processing; It further discusses optimized image segmentation; its analysis; pattern recognition and object detection. Features: Discusses machine learning based analytics such as GAN networks, autoencoders, computational imaging and quantum computing. Covers deep learning algorithms in computer vision. Showcases novel solutions such as multi-resolution analysis in imaging processing and metaheuristic algorithms for tackling challenges associated with image processing. Highlight optimization problems such as image segmentation and minimized feature design vector. Presents platform and simulation tools for image processing and segmentation. The book aims to get the readers familiar with the fundamentals of computational intelligence as well as the recent advancements in related technologies like smart applications of digital images and other enabling technologies from the context of image processing and computer vision. It further covers important topics such as image watermarking, steganography, morphological processing and optimized image segmentation. It will serve as an ideal reference text for senior undergraduate, graduate students and academic researchers in fields including electrical engineering, electronics, communications engineering and computer engineering.

The Audience and Business of YouTube and Online Videos Louisa Ha, 2018-06-06. The Audience and Business of YouTube and Online Videos is a thorough analysis of YouTube audiences and creators of online videos that considers how the coexistence of user-generated and professional media content on YouTube makes the site a unique platform in the ever-expanding online video industry. Using a mixed method approach, the authors examine the underexplored business side of YouTube with a focus on product review videos, brand videos, sponsored videos and online video advertising. This book also addresses recent developments such as YouTube Red, subscription pay TV and movie services and discusses the future of online video audience research. Recommended for scholars interested in media studies, communication, marketing and popular culture.

The Essentials of Special Education Research Andrew M. Markelz, Benjamin S. Riden, 2024-08-21. Researchers in special education have been developing a knowledge base of evidence-based practices that improve the outcomes of students with disabilities. Unfortunately, filtering that knowledge into classrooms implemented by special education teachers has been a

challenge In The Essentials of Special Education Research Andrew M Markelz and Benjamin S Riden directly address the persistent research to practice gap by systematically presenting the essential components of research that every special education teacher must know The first section investigates the foundations of research and why special education teachers should regularly read research articles It also examines the basic structure of research articles to demystify jargon and provide teachers confidence when reading scientific literature The second section explores various research methodologies that consumers of research must know Methodologies such as literature reviews single case design quantitative qualitative and others are unpacked so that special education teachers know the critical components of these methodologies along with their limitations to become critical consumers of research The third section focuses on putting this knowledge into practice Using practical scenarios the authors demonstrate how a special education teacher can combat common classroom problems by locating and reading relevant research to gain information and implement best practices based on scientific evidence This step by step guide combines the knowledge and skills outlined in this book to truly become a scientific practitioner
