William H. Beamish, Scott R. McKinley, 2006-01-20 Modern North American sturgeons and paddlefish are the result of 100 million years of evolution Once an integral part of aboriginal culture their numbers were decimated by overfishing and habitat destruction during the past two centuries This book details the extensive science aimed at helping these remarkable species recover from the brink of extinction and describes the historical biological and ecological importance of North American sturgeon and paddlefish The text is enhanced by photographs and detailed line drawings This comprehensive volume will be an invaluable resource for researchers educators and consultants in academic and government settings who work to further scientific understanding of these fishes No other single compilation has documented current information in such detail *Finfish Aquaculture Diversification* M. Jobling, C. Carter, 2010 There is considerable global interest in the culture of finfish species both for cold and warm water aquaculture development and growth Essential information on the biology domestication and aquacultural characteristics of a wide selection of novel and established species is provided in the form of technical sheets species descriptions and information on current rearing practices making this a must have reference in the field of aquacultural science The book also offers a basic framework in order to support investment strategies for research and development efforts aimed at the emergence of a profitable finfish aquaculture industry and presents a rationale for species diversification different approaches to species selection and basic economical and market considerations governing the launch of strategic development and commercialization efforts *Department of the Interior and Related Agencies Appropriations for 2005* United States.
