The Pragmatics of Manipulation in British and American Political Debates Salwa Ibrahim Kamil, Fareed Hameed Al-Hindawi, 2017-03-16 The main concern of this work is to tackle manipulation in communicative events as one of the means used by politicians to achieve certain goals such as influencing the behavior desire belief and emotions of others to their self interests without evident detection of their communicative intention As a communicative event and from a pragmatic point of view manipulation in the political field has not been given enough attention Thus this study scrutinizes the pragmatic aspects of manipulation in British and American political debates As such it sets itself the task of achieving several aims the most important of which are 1 specifying the pragmatic criterion criteria according to whose presence a certain political debate is considered as manipulative 2 identifying the manipulation types used by politicians and the pragmatic strategies via which each type is fulfilled 3 exhibiting the whole pragmatic structure of manipulative whether British or American political debates 4 pinpointing both the manipulative pragmatic strategies used to fulfill each sub stage component and manipulative strategies adopted to attain all the sub stages components of the entire pragmatic structure of manipulation 5 highlighting the manipulative pragmatic strategies the manipulative strategies as well as the manipulation types highly resorted to by politicians in political debates 6 showing transparent inter intra differences that can be detected in terms of the debater s employment of manipulation types the whole pragmatic structure of manipulation the manipulative pragmatic strategies and the manipulative strategies used by the debaters and 7 developing a pragmatic model for identifying the types of manipulation and the pragmatic strategies used to fulfill each type in addition to another eclectic model to analyze the pragmatic structure and strategies of the data under scrutiny

Pragmatic Analysis of Political Data Fareed Hameed Al-Hindawi, Waleed Ridha Al-Juwaid, 2017 This book tackles various pragmatic issues which are manipulated by politicians in diverse contexts where the principle of being honest is less important than fulfilling their goals These issues range from Irony to Impoliteness Deception Diplomacy Fallacy and Political Accusations Besides it reveals what pragmatic strategies are appealed to by those politicians to win over their opponents or convince their audience Revealing those strategies is done by pragmatic analytical models which are applied to verbal and nonverbal data Thus the book can be useful to politicians pragmaticians and applied linguists Additionally the book is indispensable to researchers interested in pragmatics as it suggests different approaches about how to build pragmatic analytical models and how to use them to analyze political data or any other kind of data

A Pragmatic Theory of Rhetoric Walter H. Beale, 1987

Walter H Beale offers the most coherent treatment of the aims and modes of discourse to be presented in more than a decade His development of a semiotic grammar of motives that relates the problems of meaning in discourse both to linguistic structure and ways of constructing reality stands as a provocative new theory of rhetoric sharply focused on writing He includes a comprehensive treatment of rhetoric its classes and varieties modes and strategies In addition he demonstrates the importance of the purpose substance and social context of discourse at a time when scholarly attention has become preoccupied with process He fortifies and extends the Aristotelian approach to rhetoric and discourse at a time when much theory and pedagogy have yielded to modernist assumptions and methods And finally he develops a theoretical framework that illuminates the relationship between rhetoric the language arts and the human sciences in general

Paul's Argumentation in Galatians Mika Hietanen, 2007-07-26

Galatians is a polemical letter which contains a substantial amount of argumentative passages Paul evidently wanted to persuade by using the best arguments possible to convince his addressees Using a state of the art method from the discipline of argumentation analysis Paul's argumentation can be analysed with a

precision that standard exegetical methods cannot provide The pragma dialectical method developed in Amsterdam facilitates an analysis which is both descriptive and normative On the one hand Paul s argumentation can be described such as the relationship between premisses and conclusions the structure of the arguments and features relating to rhetorical strategy On the other hand the method makes it possible to evaluate Paul s argumentation against a set of rules for sound reasoning Fallacies and problematic arguments can be described accurately The spiritual nature of Paul s matters do not relieve him of rationality and Paul himself does not argue as if it did Paul s argumentation is found problematic in several respects There is a tension in the text Paul works a great deal to argue his claims while at the same time giving the impression that he merely wants to declare his standpoints and does not want to carry out an argumentation at all Many of the conclusions are presented as self evident even when they are not Paul s style is far from an ideal model of the resolution of a dispute Paul relies heavily on an argumentative strategy with maximal use of rhetorical devices The analysis shows that a contemporary method of argumentation analysis provides tools necessary to adequately describe and understand both individual arguments and the overarching strategy of the argumentation in a Pauline text
