Africa's Third Liberation The New Search For Prosperity And Jobs:

Africa's Third Liberation Greg Mills, 2014-06-02 Africa has experienced two liberations the first from colonial and racist regimes and the second from the autocrats who often followed foreign rule African countries now have the potential to undertake a third liberation from political economies characterised by graft crony capitalism rents seeking elitism and social inequality This third liberation will open up the economic space in which business can compete a necessary condition for expanding employment During the 2000s the continent had its best growth decade on record since independence High commodity prices offer a launch pad for sustained growth and employment creation Now is the moment for African countries to act This book asks how Africa's political leaders and interest groups can promote economic growth in their countries Drawing on studies of countries outside Africa Jeffrey Herbst and Greg Mills identify the factors separating the performers from the laggards worldwide Aside from the need to create an enabling environment for business through good governance provision of infrastructure and improvements in education most critical is the need for a laser like development focus by governments In Africa's Third Liberation Jeffrey Herbst and Greg Mills show why a new African political debate is necessary to make progress in accelerating growth and creating jobs Africa's Third Liberation Jeffrey Ira Herbst, Greg Mills, 2014

The Oxford Handbook of the Politics of Development Carol Lancaster, Nicolas van de Walle, 2018-05-01 In many discussions of nations development we often focus on their economic and social development Is it becoming wealthier Is its society modernizing Is it becoming more technologically sophisticated Are social outcomes improving for the broad mass of the public The process of development policy implementation however is always and inevitably political Put simply regime type matters when it comes to deciding on a course of development to follow Further political institutions matter When a government's institutional capacity is low the chances of success severely decline regardless of the merits of the

development plan In The Oxford Handbook of the Politics of Development two of America s leading political scientists on the issue Carol Lancaster and Nicolas van de Walle have assembled an international cast of leading scholars to craft a broad state of the art work on this vitally important topic This volume is divided into five sections major theories of the politics of development organized historically e g modernization theory dependency theory the Washington consensus of policies without politics etc key domestic factors and variables key international factors and variables political systems and structures and geographical perspectives inclusive of regional dynamics A comprehensive and cross regional examination on key issues of political development this Handbook not only provides an authoritative synthesis of past scholarship but also sets the agenda for future research in this discipline Handbook of Public Management in Africa Gerrit van der Waldt,2023-12-11 This forward thinking Handbook provides a thorough and comprehensive guide on the positive prospects for public management and governance across the African continent Exploring best practices learned by public management and governments in the region this book examines Africa s ability to leapfrog developed nations in the adoption and adaptation of managerial models techniques and applications for government *Reclaiming Economic Sovereignty in Africa* Horman Chitonge,2025-04-08 This book has examined the way African countries utilise their natural wealth It has illustrated that weak economic sovereignty accounts for the irony that the most endowed continent on the planet has ended being the most impoverished It is argued in this book that weak economic sovereignty in Africa has several implications including the situation where the continent is unable to make the most out of its abundant natural wealth Weak economic sovereignty on the continent is manifested in the low levels of financial and monetary sovereignty among African countries but most importantly in low productive capabilities The conditions of low productive capabilities prevailing on the African continent have created a situation where most African countries are locked into economically debilitating dependencies including dependence on commodity export such that they only get a tiny proportion of the value generated from natural resources extracted from their territories The book has also argued that the persisting weak economic sovereignty on the continent is a clear indication that while African countries attained political sovereignty six decades ago attaining economic sovereignty has remained an incomplete liberation project that requires a new strategy to accomplish *Making Africa Work* Greg Mills,Olusegun Obasanjo,Jeffrey Herbst,Dickie Davis,2017-09-15 Sub Saharan Africa faces three big inter related challenges over the next generation It will double its population to two billion by 2045 By then more than half of Africans will be living in cities And this group of mostly young people will be connected with each other and the world through mobile devices Properly harnessed and planned for this is a tremendously positive force for change Without economic growth and jobs it could prove a political and social catastrophe Old systems of patronage and of muddling through will no longer work because of these population increases Instead if leaders want to continue in power they will have to promote economic growth in a more dynamic manner Making Africa Work is a first hand account and handbook of how to ensure growth beyond
