Applications Of Pulse Coupled Neural Networks:

Applications of Pulse-Coupled Neural Networks Yide Ma,Kun Zhan,Zhaobin Wang,2011-09-02 Applications of Pulse Coupled Neural Networks explores the fields of image processing including image filtering image segmentation image fusion image coding image retrieval and biometric recognition and the role of pulse coupled neural networks in these fields This book is intended for researchers and graduate students in artificial intelligence pattern recognition electronic engineering and computer science Prof Yide Ma conducts research on intelligent information processing biomedical image processing and embedded system development at the School of Information Science and Engineering Lanzhou University China

Applications of Pulse Coupled Neural Networks Yide Ma,Kun Zhan,Zhaobin Wang,2010 *Image Processing using Pulse-Coupled Neural Networks* Thomas Lindblad,Jason M. Kinser,2013-05-13 Image processing algorithms based on the mammalian visual cortex are powerful tools for extraction information and manipulating images This book reviews the neural theory and translates them into digital models Applications are given in areas of image recognition foveation image fusion and information extraction The third edition reflects renewed international interest in pulse image processing with updated sections presenting several newly developed applications This edition also introduces a suite of Python scripts that assist readers in replicating results presented in the text and to further develop their own applications **Image Processing**

using Pulse-Coupled Neural Networks Thomas Lindblad,Jason M. Kinser,2013-04-17 Pulse coupled neural networks represent a new and exciting advance in image processing research When exposed to grey scale or colour images they produce a series of binary pulse images which allow the content of the image to be assessed much more accurately than from the original In this volume Thomas Lindblad and Jason Kinser provide a much needed introduction to the topic of PCNNs They review the theoretical foundations and then look at a number of image processing applications including segmentation edge extraction texture extraction object identification object isolation motion processing foveation noise suppression and image fusion They also look at the PCNNs ability to process logical arguments and at how to implement it in specialised hardware It will be of particular interest to researchers and practitioners working in image processing especially those involved with medical military or industrial applications It will also be of interest to graduate level students *Neuronal Network Research Horizons* Martin L. Weiss,2007 In neuroscience a neural network is a bit of conceptual juggernaut the conceptual transition from neuroanatomy a rigorously descriptive discipline of observed structure to the designation of the parameters delimiting a network can be problematic In outline a neural network describes a population of physically interconnected neurons or a group of disparate neurons whose inputs or signalling targets define a recognisable circuit Communication between neurons often involves an electrochemical process The interface through which they interact with surrounding neurons usually consists of several dendrites input connections which are connected via synapses to other neurons and one axon output connection If the sum of the input signals surpasses a certain threshold the neuron sends an

action potential AP at the axon hillock and transmits this electrical signal along the axon This important book presents the latest research in this field Engineering Applications of Neural Networks Valeri Mladenov,Chrisina Jayne,Lazaros Iliadis,2014-08-15 This volume constitutes the refereed proceedings of the 15th International Conference on Engineering Applications of Neural Networks EANN 2014 held in Sofia Bulgaria in September 2014 The 18 revised full papers presented together with 5 short papers were carefully reviewed and selected from 37 submissions The papers demonstrate a variety of applications of neural networks and other computational intelligence approaches to challenging problems relevant to society and the economy These include areas such as environmental engineering facial expression recognition classification with parallelization algorithms control of autonomous unmanned aerial vehicles intelligent transport flood forecasting classification of medical images renewable energy systems intrusion detection fault classification and general engineering

Advances in Neural Network Research and Applications Zhigang Zeng,Jun Wang,2010-05-10 This book is a part of the Proceedings of the Seventh International Symposium on Neural Networks ISNN 2010 held on June 6 9 2010 in Shanghai China Over the past few years ISNN has matured into a well established premier international symposium on neural networks and related fields with a successful sequence of ISNN series in Dalian 2004 Chongqing 2005 Chengdu 2006 Nanjing 2007 Beijing 2008 and Wuhan 2009 Following the tradition of ISNN series ISNN 2010 provided a high level international forum for scientists engineers and educators to present the state of the art research in neural networks and related fields and also discuss the major opportunities and challenges of future neural network research Over the past decades the neural network community has witnessed significant breakthroughs and developments from all aspects of neural network research including theoretical foundations architectures and network organizations modeling and simulation empirical studies as well as a wide range of applications across different domains The recent developments of science and technology including neuroscience computer science cognitive science nano technologies and engineering design among others has provided significant new understandings and technological solutions to move the neural network research toward the development of complex large scale and networked brain like intelligent systems This long term goals can only be achieved with the continuous efforts from the community to seriously investigate various issues on neural networks and related topics Multi-Sensor Image Fusion and Its Applications Rick S.
