Confined Workspaces - for the Construction Industry Robert J. Firenze,1985 The NIOSH training resource manual
 concerning safety and health in confined workspaces is presented The manual is intended to provide contractors and others
 in the construction industry with an understanding of safety and health associated with confined workspaces and the
 safeguards necessary to minimize hazards Accidents in confined spaces are considered Responsibilities for safety and health
 in confined workspaces are discussed Essential processes in a confined workspace hazard control program are considered
 The characteristics of confined workspaces in the construction industry are examined An analysis of confined workspace
 accidents is presented Preliminary steps for entry into confined workspaces are noted Safe entry permits are illustrated
 Workspace testing and monitoring are discussed Atmospheric test procedures and instrumentation are described Ventilation
 of confined workspaces is examined Fire and fire protection are discussed The physiological aspects of work in confined
 spaces are considered Noise is discussed Personal protective equipment safety equipment and safe practices are cited
 NIOSHTIC 2 **Industrial Hygiene Control of Airborne Chemical Hazards** William Popendorf,2006-05-15 Do you need
 guidelines for choosing a substitute organic solvent that is safer to use Do you need an effective cheap but perhaps
 temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable

solution Do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves Industrial Hygiene Control of Airborne Chemical Hazards provides the answers to these questions and more Science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards It bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of IH practitioners to control chemical hazards Provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace Although William Popenorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems Where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations
