The Secret of Progress (Classic Reprint) W. Cunningham, 2016-10-16 Excerpt from The Secret of Progress Buckle1 regarded it as clear that militarism and high intellectual development were not compatible till recently many people were prepared to believe that warfare was alien to the interest of civilised peoples and could only occur among half civilised or backward races But this war has shown that these hopes were vain and that the last result of civilisation was not to render war impossible but to give the means of carrying it out on a vastly extended scale The increase of knowledge and of power over nature and the sense of the benefits of intercourse and inter communication have not sufficed to give us any immunity from war About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Evangelicalism and the Politics of Reform in Northern Black Thought, 1776-1863 Rita Roberts, 2011 During the revolutionary age and in the early republic when racial ideologies were evolving and slavery expanding some northern blacks surprisingly came to identify very strongly with the American cause and to take pride in calling themselves American In this intriguing study Rita Roberts explores this phenomenon and offers an in depth examination of the intellectual underpinnings of antebellum black activists She shows how conversion to Christianity led a significant and influential population of northern blacks to view the developing American republic and their place in the new nation through the lens of evangelicalism American identity therefore even the formation of an African ethnic community and later an African American identity developed within the evangelical and republican ideals of the revolutionary age Evangelical values Roberts contends exerted a strong influence on the strategies of northern black reformist activities specifically abolition anti racism and black community development The activists and reformers commitment to the United States and firm determination to make the country live up to its national principles hinged on their continued faith in the possibility of the collective transformation of all Americans The people of the United States both black and white they believed would become a new citizenry distinct from any population in the world because of their commitment to the tenets of the Christian republican faith Roberts explores the process by which a collective identity formed among northern free blacks and notes the ways in which ministers and other leaders established their African identity through an emphasis on shared oppression She shows why in spite of slavery's expansion in the 1820s and 1830s northern blacks demonstrated more not less commitment to the nation Roberts then examines the Christian influence on racial theories of some of the major abolitionist figures of the antebellum era including Frederick Douglass Martin Delany and especially James McCune Smith and reveals how activists sense of their American identity waned with the intensity of American racism and the passage of laws that further protected slavery in the 1850s But the Civil War and Emancipation Proclamation she explains renewed hope that America would soon become a free and equal nation Impeccably researched *Evangelicalism and the Politics of Reform in Northern Black Thought 1776 1863* offers an innovative look at slavery abolition and African American history *The First*

Print Era Daniel Fried, 2023-12-05 The First Print Era examines the rise of print culture during China's Northern Song Dynasty 960-1127. Bringing together often overlooked primary sources from the period and scholarship on many individual topics in Song print history, the book offers the first extended narrative in English of how print became entrenched as a sustained mode of textual dissemination in China. While discussing technical innovations and the growth of the print industry, the book focuses on how the rise of print affected several indispensable elements of Song intellectual culture: the expansion of the exam system, the canonization of Tang and earlier models, the rise of antiquarianism and connoisseurship, the birth of Neo-Confucianism as a new intellectual force, the growth of a new literati culture and new forms of literary production and critique, and the development of calligraphy as an art form that could be taught, critiqued, and divided into schools. Overall, the book describes a process by which print publication moved from a highly centralized state enterprise back to expanded elite use and eventually towards the popular print markets that would create new forms of expression during the Southern Song and Yuan dynasties. This book will be an essential read for students and scholars of Asian studies, Medieval studies, and those with a focus on print history and Chinese studies.

A Book of Cambridge Verse (Classic Reprint) Ernest Edward Kellett, 2018-02-02 Excerpt from *A Book of Cambridge Verse*: Nevertheless after all deductions have been made how much true poetry is yet left. He must be hard to please who cannot find intense enjoyment in the Eclogues of Phineas Fletcher in Cowley's epitaph on Harvey in the Miltonic stanzas of Gray's Installation Ode in a score of other pieces grave, quaint, or classical in their allusive ness of phrasing. Especially grateful must we be to the number of poets of exquisite feeling and easy mastery of form who during the last fifty or sixty years have enriched the language with delicate and elegant verse from which it has been only too difficult to choose because its quantity is so great and its merit so even. Of this we trust we have given a tolerably adequate selection but it would have been easy to multiply it fourfold.
