verbs in English communicate delicate shades of meaning there being a large range of verbs both on the necessity side must have to should ought to need need to and the possibility side can may could might be able to They therefore constitute excellent test ground to apply and compare different methodologies that can lay bare the factors that drive the speaker's choice of modal verb This book is not merely concerned with a purely grammatical description of the use of modal verbs but aims at advancing our understanding of lexical and grammatical units in general and of linguistic methodologies to explore these It thus involves a genuine effort to compare assess and combine a variety of approaches It complements the leading descriptive qualitative work on modal verbs by testing a diverse range of quantitative methods while not ignoring qualitative issues pertaining to the semantics pragmatics interface Starting from a critical assessment of what constitutes the meaning of modal verbs different types of empirical studies usage based data driven and experimental drawing considerably on the same data sets shows how method triangulation can contribute to an enhanced understanding Due attention is also given to individual variation as well as the degree to which modals can predict L2 proficiency level

The Present-day English Gerund System Charlotte Maekelberghe, 2020-09-21 This study offers a first comprehensive synchronic account of the Present day English gerundial system Most synchronic studies of gerunds have hitherto focused on the verbal gerund scrutinizing its categorial status or comparing it with other non finite clausal structures A systematic comparison with its nominal counterpart however is lacking Based on a detailed empirical analysis of lexico grammar and semantics this study develops an innovative cognitive constructionist model of the English gerund system which depicts the usage profiles of nominal and verbal gerunds in terms of probabilistic trends rather than by means of categorial labels It is shown that a better understanding of the functioning of the English gerund system requires a description that operates on multiple levels accounting for both the abstract construal gerunds can impose on an event as well as the token level constraints on variation between the two gerund types This multifaceted approach it is argued not only offers a new perspective on the configuration of ing forms in Present day English it can also be of relevance to the description of other complex grammatical structures
