

ADVANCED CONCRETE TECHNOLOGY

UNIT – 1

CEMENT

- Cement, any material that hardens and becomes strongly adhesive after application.
- Manufactured substance consisting of gypsum plaster, or Portland cement
- Portland cement hardens and adheres after being mixed with water.

HISTORY OF CEMENT:

- The term “Portland cement” was first used in 1824 by Joseph Aspdin, a British cement-maker, because of the resemblance between concrete made from his cement and Portland stone, which was commonly used in building in Britain.
- The first modern Portland cement, made from lime and clay materials heated until they formed clinkers was produced by Isaac Charles Johnson in Britain in 1845.
- At that time cements were usually made in upright kilns where the raw materials were spread between layers of coke, which was then burnt.
- The first rotary kilns were introduced about 1880. Portland cement is now almost universally used for structural concrete.
