If Nietzsche Were a Narwhal Justin Gregg, 2022-08-09 This funny extraordinary and thought provoking The Wall Street Journal book asks whether we are in fact the superior species As it turns out the truth is stranger and far more interesting than we have been led to believe If Nietzsche Were a Narwhal overturns everything we thought we knew about human intelligence and asks the question would humans be better off as narwhals Or some other less brainy species There s a good argument to be made that humans might be a less successful animal species precisely because of our amazing complex intelligence All our unique gifts like language math and science do not make us happier or more successful evolutionarily speaking than other species Our intelligence allowed us to split the atom but we ve harnessed that knowledge to make machines of war We are uniquely susceptible to bullshit though cuttlefish may be the best liars in the animal kingdom our bizarre obsession with lawns has contributed to the growing threat of climate change we are sexually diverse like many species yet stand apart as homophobic and discriminate among our own as if its natural which it certainly is not Is our intelligence more of a curse than a gift As scientist Justin Gregg persuasively argues there s an evolutionary reason why human intelligence isn t more prevalent in the animal kingdom Simply put non human animals don t need it to be successful And miraculously their success arrives without the added baggage of destroying themselves and the planet in the process In

Animal Lessons Kelly Oliver, 2009 Philosophy reads humanity against animality arguing that man is man because he is separate from beast Deftly challenging this position Kelly Oliver proves that in fact it is the animal that teaches us to be human Through their sex their habits and our perception of their purpose animals show us how not to be them This kinship plays out in a number of ways We sacrifice animals to establish human kinship but without the animal the bonds of brotherhood fall apart Either kinship with animals is possible or kinship with humans is impossible Philosophy holds that humans and animals are distinct but in defending this position the discipline depends on a discourse that relies on the animal for its very definition of the human Through these and other examples Oliver does more than just establish an animal ethics She transforms ethics by showing how its very origin is dependent upon the animal Examining for the first time the treatment of the animal in the work of Heidegger Merleau-Ponty Derrida Agamben Freud Lacan and Kristeva among others *Animal Lessons* argues that the animal bites back thereby reopening the question of the animal for philosophy
