Animal Voices Telepathic Communication In The Web Of Life:

Animal Voices Dawn Baumann Brunke, 2002-05-01 Animals ranging from mosquitoes to elephants use their own words to guide humanity to a deeper spiritual awakening Contains interviews with 25 professional animal communicators and over 100 different animals and animal spirits Provides a thrilling glimpse of the possibilities of direct animal human dialogue According to Echo an Arabian mare Humans are beings of love who have forgotten what love is and who they are Along with a host of other animal communicators Dawn Baumann Brunke gives animals like Echo a voice a direct line of communication to the human mind Through Animal Voices the animal kingdom delivers a message about deepening our spirituality and reconnecting with the web of life Our earliest ancestors had an ongoing shamanic dialogue with the animal kingdom but this ability has been lost to most in the modern world Brunke provides the techniques to reopen these connections reminding us that when we are open to communication with animals we are open to deeper layers of ourselves The main contributors to this book are actual animals who reveal themselves to be sentient beings with their own thoughts emotions and spiritual reasons for being on the planet How Brunke overcame her initial skepticism and learned to hear their voices is a fascinating story Throughout Animal Voices the author integrates her own reflections with those of the animals she interviews The result is something that will delight animal lovers and force skeptics to reconsider their ideas about the nature of animal consciousness and the possibility of telepathic human animal communication

Everyday Oracles Ann Bolinger-McQuade, 2013-07-11 It could be a cloud in the shape of a loved one's face or an extremely relevant song playing on the radio at the exact time of a friend's death if we allow ourselves to stop look and listen we can identify what spiritual teacher Ann Bolinger McQuade calls personal oracles And when we tune into these subtle messages from Spirit we will discover guidance for navigating life's most trying situations In this illuminating book readers will learn that the universe is constantly conspiring in our favor and is ready to lend a helping hand when we need it most if only we can look closely and open our hearts to the divine messages that are on display around us Sharing stories of divine inspiration from her own life as well as the lives of others many of them well known historical or contemporary figures McQuade shows readers how

SIR ISAAC NEWTON'S APPLE WAS ACTUALLY AN EVERYDAY ORACLE Many are familiar with the story of how Sir Isaac Newton first discovered gravity when an apple fell on his head It is a lesser known fact that Newton was interested in the supernatural Born in the 1600s when astronomy and astrology were considered one and the same the highly respected alchemist looked to the heavens to assist him in his quest to decode the mysteries of the universe The falling apple that arrested his attention acted as a personal oracle In addition to illuminating oracles through examples McQuade discusses the history and science of oracles in general and of personal oracles specifically offering the reader practical instructions for identifying and decoding the divine messages in their own lives

Animals and Psychedelics

Giorgio Samorini,2002-08-01 An Italian ethnobotanist explores the remarkable propensity of wild animals to seek out and use psychoactive substances Throws out behaviorist theories that claim animals have no consciousness Offers a completely new understanding of the role psychedelics play in the development of consciousness in all species Reveals drug use to be a natural instinct From caffeine dependent goats to nectar addicted ants the animal kingdom offers amazing examples of wild animals and insects seeking out and consuming the psychoactive substances in their environments Author Giorgio Samorini explores this little known phenomenon and suggests that far from being confined to humans the desire to experience altered states of consciousness is a natural drive shared by all living beings and that animals engage in these behaviors deliberately Rejecting the Western cultural assumption that using drugs is a negative action or the result of an illness Samorini opens our eyes to the possibility that beings who consume psychedelics whether humans or animals contribute to the evolution of their species by creating entirely new patterns of behavior that eventually will be adopted by other members of that species The author s fascinating accounts of mushroom loving reindeer intoxicated birds and drunken elephants ensure that readers will never view the animal world in quite the same way again

Our Dolphin Ancestors Frank Joseph,2016-03-17 Reveals the shared ancestry behind our affinity with dolphins and our shared destiny Explains how we are both descendants of the aquatic ape and still share many physiological features with dolphins that set us apart from other primates Explores dolphins communication with other species and how dolphin therapy has miraculous effects on people with autism cancer stroke and depression Explores the connections between dolphins and Atlantis and Lemuria Wild animals avoid contact with humans but wild dolphins seek us out to play and socialize even going so far as to voluntarily rescue people from drowning What explains this remarkable natural affinity Revealing the evolutionary basis for our special relationship with dolphins Frank Joseph explains how we are both descendants of the same ancient branch of human ity Building upon the aquatic ape theory he details how we both began on land but devastating floods forced our distant ancestors into the seas where humanity developed many of the traits that set us apart from other primates such as our instinctive diving reflex and our newborns ability to swim But while some of the aquatic apes returned to land later evolving into modern humans some remained in the cradle of Mother Ocean and became our dolphin cousins Integrating scientific research on dolphin intelligence communication and physiology with enduring myths from some of the world s oldest cultures such as the Aborigines Norse Greeks and Celts the author examines our physical commonalities with dolphins including their vestigial thumbs and legs birth processes and body temperature He explores dolphins uncanny ability to diagnose disease such as cancer in humans and how dolphin therapy has had miraculous effects on children with autism victims of stroke and those suffering from depression He provides evidence for dolphins different attitudes toward men women and children their natural affinity with cats and dogs and their telepathic communication with other species including ours He explores dolphins mysterious role in the birth of early civilization and their connections with the Dog Star Sirius and Atlantis and Lemuria a bond still

commemorated by annual gatherings of millions of dolphins As Frank Joseph shows if we can learn to fully communicate with dolphins accessing their millennia old oral tradition we may learn the truth about humanity s origins and our shared future when humankind may yet again quit the land for a final return to the sea
