Emotions Jean-Paul Sartre, 2012-01-17 One of the leading twentieth century French existentialist philosophers examines how human emotions shape our existence In The Emotions Outline of a Theory French philosopher Jean Paul Sartre attempts to understand the role emotions play in the human psyche Sartre analyzes fear lust anguish and melancholy while asserting that human beings begin to develop emotional capabilities from a very early age which helps them identify and understand the emotions names and qualities later in life Helping to complete the circle of Sartre's many theories on existentialism this vital piece of literature is a must have for the philosopher in training's collection A Theory of Feelings Agnes

Heller, 2009-01-01 A Theory of Feelings examines the problem of human feelings widely understood from phenomenological analytic and historical perspectives It begins with an analysis of drives and affects and pursues the nature of feeling itself in all of its variability through a close study of the distinctive categories of emotions emotional dispositions orientive feelings and the passions As such the starting point of the analysis entails an examination of the characteristics of human involvement or our ways of being in the world Building upon this assessment of the conditions of human involvement the philosophical history and emotional economy characteristic of modern relationships is treated and the nature of expression social division suffering and responsibility is evaluated in light of the theory of feeling presented here Book jacket **Sketch for a Theory**

of the Emotions Jean-Paul Sartre, 2015-10-15 Philosopher novelist dramatist and existentialist Jean Paul Sartre is one of the greatest writers of all time He was fascinated by the role played by the emotions in human life and placed them at the heart of his philosophy This brilliant short work which contains some of the principal ideas later to appear in his masterpiece Being and Nothingness is Sartre at his best insightful engaging and controversial Far from constraining one's freedom as we often think Sartre argues that emotions are fundamental to it and that an emotion is nothing less than a transformation of the world With a new foreword by Sebastian Gardner **We as Self** Hye Young Kim, 2021-01-28 We as Self argues for a notion

of we-ness based not on a self-centered or a self-less point of view in which the we is only either a collection of individuals or an anonymous whole but on relation This relation is pre-subjective meaning that the conscious reflective subjective self is not

the conceptual basis of the relation The irreducible metaphysical distinction between self and other is always there but the awareness of it is not prior to this relation which is an ontological pre condition of self Hye Young Kim demonstrates that the distinction and unity of self and other in this relation can be comprehended spatially by applying knot logic The author analyzes certain linguistic practices in Korean to show one representation of pre subjective we ness in language but not in an ethnographical manner By doing so the author criticizes and challenges the Eurocentric tendency of philosophy and contributes to efforts to expand diversity in philosophy Love and Other Emotions Jason W. Brown,2012 This book is an account of the psychology of romantic love in the context of a theory of emotions The account develops out of studies in brain psychology and the extension to topics in process philosophy such as the nature of value and belief and the central role of feeling in mental process The approach is subjectivist that is from the internal standpoint and in this respect it differs greatly from the externalist and objectivist trends in modern cognitive science and empiricist philosophy Love is the ultimate in value so that a theory of love is also a theory of the nature of value and its relation to feeling belief and to drive and desire The role of intention reason and appraisal is critiqued The relation to other feelings such as jealousy envy anger loss and grief is discussed in terms of a general theory of emotion and the basis in a process account of the mind brain state **Emotion**
