Public Sector Transformation Processes and Internet Public Procurement: Decision Support Systems Pomazalová, Natasa, 2012-12-31 While many social economic and political changes have occurred recently in internet public procurement and its decision support systems there is still a lot of opportunity for improvement Public Sector Transformation Processes and Internet Public Procurement Decision Support Systems brings together research on different perspectives from academics and practitioners on the methods theories and practices involved in the growth and expansion of decision support systems as it relates to the public sector transformation process and internet public procurement *OECD Digital Government Studies Digital Government in Chile - Improving Public Service Design and Delivery* OECD, 2020-05-30 This report presents a conceptual model for service design and delivery that challenges governments to develop a design led culture and ensure access to the enabling tools and resources necessary to deliver services that improve outcomes efficiency satisfaction and well being This model is used to analyse the situation in Chile and provide recommendations about how the ChileAtiende service delivery network can bring the state closer to citizens through a simpler more efficient and transparent approach **Delivering Social Welfare** Derek Birrell, Ann Marie Gray, 2016-12-14 As the system of governance and delivery of social welfare in the UK radically changes this important new book argues that the extent of this change is such that it could be considered a fundamental transformation or even a revolution It shows how a new public governance perspective has replaced the dominance of new public management reflecting the increasingly plural and fragmented nature of public policy implementation Drawing on examples across a range of policy areas it assesses how changes in social policy and governance interact in the delivery of the main areas of social policy and social welfare The book will be essential reading for researches students and policy makers Digitizing Government A. Brown, J. Fishenden, M. Thompson, 2014-11-26 For businesses large and small investment in digital technologies is now a priority essential for success Digitizing Government provides practical advice for understanding and implementing digital transformation to increase business value and improve client engagement and features case studies from the private and public sectors

Service transformation David Sir Varney, Great Britain: H.M. Treasury, 2006-12-06 The focus of this review is how to save government citizen and business time and money by examining the scope of integrating front line service delivery The Service Sector is an important economic bulwark in a modern society with technology revolutionizing the way service providers interact with customers Yet with the continued pace of social demographic and technological change public service delivery is facing an increasing challenge with a gap developing between public and private service delivery Central Government delivers such services through departments whilst departments make use of agents or agencies alone or in co operation with local government Such a system develops a transactional relationship that is the department focuses on the specific customer need but does not take account of the overview that is the Government s relationship with the citizen who

may need multiple services but has to contact the various but separate helplines call centres front line offices and websites to obtain the relevant service they require A similar situation seems to apply to business with the need to provide the same data to different parts of government for different services The report believes that a much more fundamental and widespread change is necessary if the public service economy is to match the performance of the best service providers The Service Sector should follow international developments and learn from other countries experiences of creating a more responsive and integrated public service This report focuses on the opportunities for change in the channels through which services are delivered to citizens and business especially the development of single points of contact with government to meet a range of their needs and those of business This report builds on those published by Sir Peter Gershon ISBN 1845320328 and Sir Michael Lyons ISBN 1845320093 in 2004 available on HM Treasury website [Machine Learning with Apache Spark Quick Start Guide](#) Jillur Quddus,2018-12-26 Combine advanced analytics including Machine Learning Deep Learning Neural Networks and Natural Language Processing with modern scalable technologies including Apache Spark to derive actionable insights from Big Data in real time Key FeaturesMake a hands on start in the fields of Big Data Distributed Technologies and Machine LearningLearn how to design develop and interpret the results of common Machine Learning algorithmsUncover hidden patterns in your data in order to derive real actionable insights and business valueBook Description Every person and every organization in the world manages data whether they realize it or not Data is used to describe the world around us and can be used for almost any purpose from analyzing consumer habits to fighting disease and serious organized crime Ultimately we manage data in order to derive value from it and many organizations around the world have traditionally invested in technology to help process their data faster and more efficiently But we now live in an interconnected world driven by mass data creation and consumption where data is no longer rows and columns restricted to a spreadsheet but an organic and evolving asset in its own right With this realization comes major challenges for organizations how do we manage the sheer size of data being created every second think not only spreadsheets and databases but also social media posts images videos music blogs and so on And once we can manage all of this data how do we derive real value from it The focus of Machine Learning with Apache Spark is to help us answer these questions in a hands on manner We introduce the latest scalable technologies to help us manage and process big data We then introduce advanced analytical algorithms applied to real world use cases in order to uncover patterns derive actionable insights and learn from this big data What you will learnUnderstand how Spark fits in the context of the big data ecosystemUnderstand how to deploy and configure a local development environment using Apache SparkUnderstand how to design supervised and unsupervised learning modelsBuild models to perform NLP deep learning and cognitive services using Spark ML librariesDesign real time machine learning pipelines in Apache SparkBecome familiar with advanced techniques for processing a large volume of data by applying machine learning algorithmsWho this book is for This book is aimed at Business Analysts Data Analysts and Data Scientists
