Actions And Objects From Hobbes To Richardson:

Actions and Objects from Hobbes to Richardson Jonathan Kramnick, 2010-08-30 How do minds cause events in the world How does wanting to write a letter cause a person's hands to move across the page Actions and Objects examines the literature and philosophy of action during the late seventeenth and early eighteenth centuries when philosophers novelists poets and scientists were all concerned with the place of the mind in the world They wondered whether belief desire and emotion were part of nature and thus subject to laws of cause and effect or in a special place outside the natural order The book emphasizes writers who tried to make actions compatible with external determination and to blur the boundary between mind and matter This kind of externalism has often been overlooked in the effort to make psychological depth and interiority arise in the eighteenth century Kramnick follows a long tradition of examining the close relation between literary and philosophical writing but he fundamentally revises the terrain situating literature alongside philosophy as jointly interested in discovering how minds work

From Action to Ethics Constantine Sandis, 2024-01-11 Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought In this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction Read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation negligence and moral responsibility with Greek tragedy social psychology and literature Along this path from action to ethics Sandis engages with Hegel Wittgenstein Anscombe Ricoeur Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy As he responds to each thinker and theme he develops his own philosophical position the key thesis of which is that philosophy of action without ethics is empty ethics without philosophy of action is blind

Fictional Matter Helen Thompson, 2017-01-13 Fictional Matter argues that chemical definitions of particulate matter shaped eighteenth century British science and literature In this lucid revisionary analysis of corpuscular science Helen Thompson advances a new account of how the experimental production of empirical knowledge defined the emergent realist novel

The Oxford Handbook of British Poetry, 1660-1800 Jack Lynch, 2016-11-10 In the most comprehensive and up to date overview of the poetry published in Britain between the Restoration and the end of the eighteenth century forty four authorities from six countries survey the poetry of the age in all its richness and diversity serious and satirical public and private by men and women nobles and peasants whether published in deluxe editions or sung on the streets The contributors discuss poems in social contexts poetic identities poetic subjects poetic form poetic genres poetic devices and criticism Even experts in eighteenth century poetry will see familiar poems from new angles and all readers will encounter poems they've never read before The book is not a chronologically organized literary history nor an encyclopaedia nor a collection of thematically related essays rather it is an attempt to provide a systematic overview of these poetic works and to restore it to a position of

centrality in modern criticism **The Oxford Handbook of British Poetry, 1660-1800** John T. Lynch, 2016 In the most comprehensive up to date account of the poetry published in Britain between the Restoration and the end of the eighteenth century a team of leading experts surveys the poetry of the age in all its richness and diversity They provide a systematic overview and restore these poetic works to a position of centrality in modern criticism **Ravishment of Reason** Brandon Chua, 2014-09-11 Ravishment of Reason examines the heroic dramas written for the restored English theatres in the later seventeenth century reading them as complex and sophisticated responses to a crisis of public life in the wake of the mid century regicide and revolution The unique form of the Restoration heroic play with its scenes of imperial conquest peopled by hesitating and indecisive heroes interrogates traditional oppositions of agency and passivity autonomy and servility that structure conventional narratives of political service and public virtue exploring in the process new and often unsettling models of order and governance Situating the dramas of Dryden Behn Boyle Lee and Crowne in their historical and intellectual context of civil war and the destabilizing theories of government that came in its wake Brandon Chua offers an account of a culture's attempts to reconcile civic purpose with political stability after an age of revolutionary change

Sovereign Power and the Enlightenment Peter DeGabriele, 2015-07-16 Sovereign Power and the Enlightenment examines the role of the novelists and historians of the eighteenth century in developing a vision of political modernity that questions traditional narratives about the rise of liberalism and the decline of sovereign power It provides a new way to link the literature and philosophy of the eighteenth century with the meditations on violence and sovereignty that have preoccupied much of the political philosophy of the first years of the twenty first century Focusing on the novelists Daniel Defoe Samuel Richardson and Ann Radcliffe and on the historians David Hume and Edward Gibbon DeGabriele shows how these authors use the resources of their respective genres to expose the persistence of sovereign violence and to outline a type of political subject who could resist the violence more effectively than the individual beloved of modern liberalism Nervous Fictions Jess Keiser, 2020-09-21 The brain contains ten thousand cells wrote the poet Matthew Prior in 1718 in each some active fancy dwells In the seventeenth and eighteenth centuries just as scientists began to better understand the workings of the nerves the nervous system became the site for a series of elaborate fantasies The pineal gland is transformed into a throne for the sovereign soul Animal spirits march the nerves like parading soldiers An internal archivist searches through cerebral impressions to locate certain memories An anatomist discovers that the brain of a fashionable man is stuffed full of beautiful clothes and billet doux A hypochondriac worries that his own brain will be disassembled like a watch A sentimentalist sees the entire world as a giant nervous system comprising sympathetic spectators Nervous Fictions is the first account of the Enlightenment origins of neuroscience and the active fancies it generated By surveying the work of scientists Willis Newton Cheyne philosophers Descartes Cavendish Locke satirists Swift Pope and novelists Haywood Fielding Sterne Keiser shows how attempts to understand the brain's relationship to the mind produced in turn new literary forms Early brain anatomists

turned to tropes to explicate psyche and cerebrum just as poets and novelists found themselves exploring new kinds of mental and physical interiority In this respect literary language became a tool to aid scientific investigation while science spurred literary invention

Ends of Enlightenment John Bender, 2012-08-08 Ends of Enlightenment explores three realms of eighteenth century European innovation that remain active in the twenty first century the realist novel philosophical thought and the physical sciences especially human anatomy The European Enlightenment was a state of being a personal stance and an orientation to the world Ways of probing experience and knowledge in the novel and in the visual arts were interleaved with methods of experimentation in science and philosophy This book's fresh perspective considers the novel as an art but also as a force in thinking The critical distance afforded by a view back across the centuries allows Bender to redefine such novelists as Defoe Fielding Goldsmith Godwin and Laclos by placing them along philosophers and scientists like Newton Locke and Hume but also alongside engravings by Hogarth and by anatomist William Hunter His book probes the kinship among realism hypothesis and scientific fact defining in the process the rhetorical basis of public communication during the Enlightenment

Maxims and the Mind Kelly Swartz, 2025-11-03 Correcting the misunderstood role of maxims at the intersection of early science and literature Eighteenth century novels are full of maxims pithy statements of received wisdom such as necessity is the mother of invention or neither a borrower nor a lender be Maxims are ancient rhetorical forms celebrated by no less an influential figure than Aristotle as powerful tools of persuasion Critics have generally explained away their ubiquitous presence in eighteenth century novels as a vestige of a premodern form As Kelly Swartz explains however their presence illustrates an important yet often overlooked aspect of the novel's relationship with the early empirical sciences Applying insights from Francis Bacon's account of aphorizing as a method of scientific writing to works by Aphra Behn Jonathan Swift Samuel Richardson and Jane Austen Swartz shows how maxims functioned in a critical role that she calls unknowing Such expressions she argues represented the not yet known as a way to inspire in readers a desire for ongoing collective inquiry Maxims also allowed these authors to invent unknowing fictional minds at once attractive and vexing ranging from the incoherent and banal to the unintelligibly rich Maxims and the Mind thus offers new insight into the nature of the relationship between science and the early novel emphasizing their shared interest in the representation of knowledge still awaiting discovery
