Active Faults Of The World:

Active Faults of the World Robert Yeats, 2012-04-26 Providing the first worldwide survey of active earthquake faults this book focuses on those described as seismic time bombs with the potential to destroy large cities in the developing world such as Port au Prince Kabul Tehran and Caracas Leading international earthquake expert Robert Yeats explores both the regional and plate tectonic context of active faults providing the background for seismic hazard evaluation in planning large scale projects such as nuclear power plants or hydroelectric dams He also highlights work done in more advanced seismogenic countries like Japan the United States New Zealand and China providing an important basis for upgrading building standards and other laws in developing nations The book also explores the impact of major quakes on social development through history It will form an accessible reference for analysts and consulting firms and a convenient overview for academics and students of geoscience geotechnical engineering and civil engineering and land use planning *Active Faults of the World* Robert S. Yeats, 2014-05-14 Active Faults of the World There is an ever increasing need for a better understanding of regional seismic hazards particularly in developing parts of the world where major building projects are planned and there is a huge migration of people to large cities that are at risk from earthquakes Disasters in recent times such as the earthquakes in Japan and Haiti are chilling proof of the dangers of building in active fault zones Encyclopedia of Solid Earth Geophysics Harsh Gupta, 2011-06-29 The past few decades have witnessed the growth of the Earth Sciences in the pursuit of knowledge and understanding of the planet that we live on This development addresses the challenging endeavor to enrich human lives with the bounties of Nature as well as to preserve the planet for the generations to come Solid Earth Geophysics aspires to define and quantify the internal structure and processes of the Earth in terms of the principles of physics and forms the intrinsic framework which other allied disciplines utilize for more specific investigations The first edition of the Encyclopedia of Solid Earth Geophysics was published in 1989 by Van Nostrand Reinhold publishing company More than two decades later this new volume edited by Prof Harsh K Gupta represents a thoroughly revised and expanded reference work It brings together more than 200 articles covering established and new concepts of Geophysics across the various sub disciplines such as Gravity Geodesy Geomagnetism Seismology Seismics Deep Earth Processes Plate Tectonics Thermal Domains Computational Methods etc in a systematic and consistent format and standard It is an authoritative and current reference source with extraordinary width of scope It draws its unique strength from the expert contributions of editors and authors across the globe It is designed to serve as a valuable and cherished source of information for current and future generations of professionals **Active faults and earthquake due to continental deformation** Chuanyou Li, Wenjun Zheng, Daoyang Yuan, Zhuqi Zhang, 2023-02-09 **Summaries of Technical Reports, Volume XIX**, 1985 *Handbook of Research on Trends and Digital Advances in Engineering Geology* Ceryan, Nurcihan, 2017-07-12 Engineering geologists face the task of addressing geological factors that can affect planning with little

time and with few resources A solution is using the right tools to save time searching for answers and devote attention to making critical engineering decisions The Handbook of Research on Trends and Digital Advances in Engineering Geology is an essential reference source for the latest research on new trends technology and computational methods that can model engineering phenomena automatically Featuring exhaustive coverage on a broad range of topics and perspectives such as acoustic energy landslide mapping and natural hazards this publication is ideally designed for academic scientists industry and applied researchers and policy and decision makers seeking current research on new tools to aid in timely decision making of critical engineering situations
