Book details

Book Synopsis

Active Learning for Fours, the fifth book in the Active Learning Series, has over 470 activities for Fours, 48 months old through 60 months old. The activities are easy to read and do with one child or a small group; "Fours Can" lists help teachers, caregivers, or parents choose the right activities for each child. Ideas on planning environments for Fours and an easy system for writing plans help set the stage for a developmentally appropriate activity program.

Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New

technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology. With *Civic Education in the Twenty First Century* we call for the United States to make these practices less isolated and more common throughout the country. The volume is broken into three major sections. First, there are four chapters exploring the history and philosophical debates about civic education, particularly with respect to its role in America's educational institutions. Then, the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations. As some examples, this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement. This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry. Finally, the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them. From the virtual civics campus of Fort Hayes State to citizens' academies throughout the country, this section shows the possibilities for schools today to once again be civics actors and promoters.
