The Concept of Race and Psychotherapy Jefferson M. Fish, 2010-11-05 Is our society color blind Trans racial Post racial And what if anything should this mean to professionals in clinical practice with diverse clients The ambitious volume *The Concept of Race and Psychotherapy* probes these questions compelling readers to look differently at their clients and themselves and offering a practical framework for more effective therapy By tracing the racial folk taxonomies of eight cultures in the Americas and the Caribbean the author elegantly defines race as a fluid construct dependent on local social political and historical context for meaning but meaningless in the face of science This innovative perspective informs the rest of the book which addresses commonly held assumptions about problem behavior and the desire to change and presents a social science based therapy model applicable to a wide range of current approaches that emphasizes both cultural patterns and client uniqueness Among the highlights of the coverage Common elements in therapy and healing across cultures The psychological appeal of racial concepts despite scientific evidence to the contrary Lessons psychology can learn from anthropology Three types of

therapeutic relationships with strategies for working effectively in each The phenomenon of discontinuous change in brief therapy Solution focused therapy from a cross cultural perspective Thought provoking reading for psychologists psychiatrists clinical social workers and other mental health professionals as well as graduate students in these fields The Concept of Race and Psychotherapy affirms the individuality and the interconnectedness of every client **Family Life in Adolescence**

Patricia Noller, Sharon Atkin, 2014-01-01 Many parents fear the time when their beautiful happy children will become unmanageable adolescents continually engaging in risky or destructive behaviour Unfortunately this view of adolescents is the focus of the media even though it relates to just a small proportion of young people As the large amount of research we report shows most adolescents are responsible young people who care about their families and crave the support of their parents It is also true however as much research indicates that the quality of the relationship parents have with their adolescents is crucial to the wellbeing of those young people We discuss the need for parents to set reasonable limits on their adolescents and to expect appropriate behavior We also show on the basis of research that children who have experienced positive caring relationships with their parents are more likely than other adolescents to behave responsibly In other words behavior in adolescence does not come out of nowhere but builds on earlier experiences in the family Because of the large amount of research reported in this volume we expect that it will be useful to practitioners from a range of professions that are likely to focus on adolescents social workers youth leaders welfare workers religious leaders psychologists and psychiatrists and contribute to a better understanding of young people and their development and the importance of families to that development *Principles of Multicultural Counseling and Therapy* Uwe P. Gielen, Juris G. Draguns, Jefferson M.

Fish, 2008-06-19 In an era of globalization characterized by widespread migration and cultural contacts psychologists counselors and other mental health professionals face a unique challenge how does one practice successfully when working with clients from so many different backgrounds Gielen Draguns and Fish argue that an understanding of the general principles of multicultural counseling is of great importance to all practitioners The lack of this knowledge can have several negative consequences during therapy including differences in expectations between counselor and client misdiagnosis of the client's concerns missed non verbal cues and the client feeling that she has been misunderstood This volume focuses on the general nature of cultural influences in counseling rather than on counseling specific ethnic groups Counseling practices from all over the world not just those of Western society are explored Bringing together the work of a diverse group of international experts the editors have compiled a volume that is not only concise and teachable but also an essential guidebook for all mental health professionals
