it provides the managerial accountant's compass as a general purpose analytical framework for managerial accounting independent of any selected theory and method. The metaphor of a compass creates a mental schema for its four points named 1 goals and principles 2 boundaries and constraints 3 methods and models and 4 collegial relationships. Dynastic Chinese and some other Central Asian cultures view the center as a fifth principal direction giving a total of five points. The center represents a high standard ethical conduct and self care or moral compass. Managerial Accountant's Compass offers an integrated and systematic guide to approaching situations that are constantly changing. It gives a protective starting pattern which produces new meanings and awareness of the ambiguity and uncertainty for each situation. Ultimately the managerial accountant's compass can help you make more effective sense of yourself your expertise and your practice in the organization where you work which should open career opportunities.
