

A promotional image for the TV show 'Vic & Bob'. At the top, two men, Vic and Bob, are shown from the waist up, floating in the air. Vic is on the left, wearing a brown suit and glasses, smiling. Bob is on the right, wearing a dark suit, looking slightly to the side. The title 'BUNCH OF FIVE' is written in large, bold, yellow capital letters across the middle of the image. Below the title, there is a pink oval containing text. At the bottom, two men are shown from the waist up, standing on a grassy field with a fence in the background. The man on the left is wearing a grey jacket and looking to the right. The man on the right is wearing a dark jacket and glasses, looking up with an open mouth. A dark blue banner with white text is at the very bottom.

Bunch Of Five Bunch Of Five:

The Power of Numbers Stilovsky, Schrödinger, 2018-02-13 In today's world the use of numbers grows by the day and we depend on them for so much. This book contains a series of lists that contain information about numbers and their use in society. They will be most useful to those with a quizzical nature but should be of general interest to all. Schrödinger's cat was an infamous and cruel thought experiment dreamt up in the last century to expose one of the mistaken ideas current in science at that time. Since escaping from the box, Felix has taken up writing and in collaboration with retired water engineer Pyotr Stilovsky he has compiled this factual compendium. **Oxford Dictionary of English Idioms** John Ayto, 2010-07-08 Offers entries for over six thousand idioms including seven hundred new to this edition and provides background information, additional cross references and national variants. **Comparison of Five Different Methods for Determining Pile Bearing Capacities** James Howard Long, 2009 **The Acquisition of Numeral Classifiers** Kasumi Yamamoto, 2011-05-03 The book is about the numeral classifier system and the acquisition of Japanese classifiers by Japanese children. It consists of two parts. First it provides a general typological characterization of numeral classifier phrases and discusses problems in determining what constitutes the nature of classifiers. It also discusses the semantic properties of numeral classifiers based on an analysis of four languages from four different language families. Second it examines the acquisitions of Japanese numeral classifiers by Japanese preschool children ages 3 to 6 with a primary emphasis on the development of comprehension. The importance of the study is that it reveals that young children have a much greater sensitivity to the conceptual underpinnings of the numeral classifier system than was previously considered to be the case. The research results also provide a converging source of evidence that young children often come to initially grasp the structure of the world in ways that are better understood in cognitive than perceptual terms. The implications will contribute to not only the area of language acquisition but also categorization and conceptual development. *General Technical Report NE*, 1980

Sentencing Multiple Crimes Jesper Ryberg, Julian V. Roberts, Jan Willem de Keijser, 2018 Sentencing Multiple Crimes confronts the practical and theoretical challenges for the criminal justice system when punishing multiple crime offenders including the proportionality of the crimes committed, the temporal span between the crimes and the relationship between theories about the punitive treatment of recidivists and multiple offenders. It provides a comprehensive examination of the dynamics involved with sentencing multiple offenders from the perspective of several legal theories.
