Bureaucracy Selected Works Of Gordon Tullock The V 6:

Public Governance and the Classical-liberal Perspective Paul Dragos Aligica, Peter J. Boettke, Vlad Tarko, 2019
Drawing on classical liberalism develops a systematic framework of principles regarding public governance *Capitalist Alternatives* Paul Dragos Aligica, Vlad Tarko, 2014-11-20 The book's objective is to explore the challenge of thinking methodically in a theoretically and empirically informed way about alternative forms of capitalism What are the most effective ways to conceptualize the existing models of capitalism that have captured the public imagination and are currently floating around in the public debate How can one mobilize empirical analysis and theory in thinking about the realm of possibilities and about the future of economic order but avoid the twin perils of scientism and historicism This book is an attempt to respond to these and related challenges First it delves into the substantive aspect of the debate taking a closer look at a set of particular forms and models of capitalism that are currently discussed both in mass media and in academic circles as plausible or at least possible alternatives to the status quo Crony State Regulatory and Entrepreneurial Capitalisms By elaborating and clarifying those models it engages in a heuristic exercise that leads to a better understanding of the task of conceptualizing and assessing in a theoretically informed way the diversity of forms of capitalism Second the book takes a step further looking at the epistemic theoretical and methodological dimensions of the discussion What is involved more precisely in our classifying and theorizing of capitalist systems and their historical evolution What is the epistemic basis for building plausible conjectures about the future evolution of an economic system What are the logical and methodological parameters of our endeavors that deal with economic systems or with the problem of continuity and change in comparative economic systems Offering an original approach to the problem of alternative forms of capitalism this book will be of great interest to scholars working in the field of comparative political economy **Tyranny Comes Home** Christopher J. Coyne, Abigail R. Hall, 2018-04-03 Many Americans believe that foreign military intervention is central to protecting our domestic freedoms But Christopher J. Coyne and Abigail R. Hall urge engaged citizens to think again Overseas our government takes actions in the name of defense that would not be permissible within national borders Emboldened by the relative weakness of governance abroad the U S government is able to experiment with a broader range of social controls Under certain conditions these policies tactics and technologies are then re imported to America changing the national landscape and increasing the extent to which we live in a police state Coyne and Hall examine this pattern which they dub the boomerang effect considering a variety of rich cases that include the rise of state surveillance the militarization of domestic law enforcement the expanding use of drones and torture in U S prisons Synthesizing research and applying an economic lens they develop a generalizable theory to predict and explain a startling trend *Tyranny Comes Home* unveils a new aspect of the symbiotic relationship between foreign interventions and domestic politics It gives us alarming insight into incidents like the shooting in Ferguson Missouri and the Snowden case which tell a common story about contemporary

foreign policy and its impact on our civil liberties

Effective Governance and the Political Economy of Coordination

Dan Greenwood, 2023-08-09 This book provides a conceptual and methodological approach for researchers evaluating governance and policy in the face of complexity and demonstrates the application of this approach across different governance and policy contexts It fills a significant gap in the literature on governance and proposes a theoretical focus on coordination to enable the assessment of multi tier cross sector governance institutions and policy It also introduces a range of applications for the proposed approach including two case studies of governance and policy for the built environment and health services The book introduces analyses and draws from a range of perspectives in political economy political science policy analysis and evaluation It also engages with longstanding debates in political economy about states and markets which are largely overlooked by political science analyses of coordination challenges in governance The book will appeal to scholars and students of governance public policy and political science The British National Bibliography Arthur James Wells, 2006

Elinor Ostrom and the Bloomington School Jayme Lemke, Vlad Tarko, 2021-08-04 Elinor Ostrom was the first female winner of the Nobel Prize in economics and her achievement has generated renewed interest in the Bloomington School research program in institutional economics and political economy These essays showcase Ostrom's extensive and lasting influence throughout economics and the wider social sciences Contributors contextualize the Bloomington School within schools of economic thought and show how Ostrom's distinct methodology has been used in policy making and governance Case studies illustrate the value of civic involvement within public policy a method pioneered by Ostrom and the Bloomington School Elinor Ostrom and the Bloomington School provides a valuable resource for those keen to understand Ostrom's approach especially when applied to policy making and wider use in the social sciences Readers new to the Bloomington School will be introduced to its central areas of research while those already familiar with the school will appreciate its subtle connections to other disciplines and research agendas *Guide to Reprints*, 2009 **Disaggregierte öffentliche**
