Planning the Impossible Eirini Kasioumi, 2021-07-05 International airports have become an inherent part of many

urban regions and key transport infrastructures for metropolitan economies Yet they are also a source of tensions often associated with the contrasting impacts of their operation Taking the example of Charles de Gaulle airport CDG in Paris the author analyzes the factors influencing urban development and the related spatial strategies Step by step she traces the history of the airport examines prominent conflicts and their management by planners and derives broader lessons Intended for town planners policy makers and urban designers the book makes an important contribution to understanding the challenges and assessing the effectiveness of planning approaches for airport regions Leadership and Cultural Change Ramona Houmanfar, Mark Mattaini, 2018-10-16 Contemporary confluences of leadership decision making and citizenship behavior often unintentionally contribute to the depletion of the world's resources escalating health education and social crises as well as community societal and cultural struggles to adapt to emerging global shifts Leadership and management practices in this context affect the wellbeing of organizational members e.g. their safety health financial security etc but also entail positive or negative impacts on consumer practices and collective community well being e.g. education obesity cancer safe or green driving energy conservation diversity based health care etc Decision making in most businesses and organizations is largely responsive to demands for short term profit or cost minimization On the consumer side both cultural values and the corporate marketing practices that sustain them encourage high levels of consumption necessary to sustain corporate practices In exploring the emerging applications of behavior science to these challenges this book showcases emerging work by internationally recognized scholars on leadership and cultural change The book will aid organizations and leaders in creating new models of stewardship and will open opportunities for innovation while adapting and responding to growing social upheaval technological advances and environmental concerns as well as crises in the global economy health education and environment This book was originally published as a special issue of the Journal of Organizational Behavior Management Railway Transportation Systems Christos N. Pyrgidis, 2021-10-31 Railway Transportation Systems covers the entire range of railway passenger systems from conventional and high speed intercity systems to suburban regional operating on steep gradients and urban ones It also examines in depth freight railway systems transporting conventional loads heavy loads and dangerous goods For each system the text provides a definition an overview of its evolution and examples of good practice the main design construction and operational characteristics and the preconditions for its selection Additionally it offers a general overview of safety interfaces with the environment forces acting on the track and techniques that govern the stability and guidance of railway vehicles This new edition brings two new chapters One concerns pre feasibility studies of urban rail projects and the other analyses the operation of railway systems under specific weather conditions and natural phenomena New material examines dilemmas trends and innovations in rail freight transportation a new definition for high speed rail a number of case studies and an update of cutting edge technologies It is ideal for graduate students engineers consultants manufacturers and transport company executives who need a reference and guide **The**
