Algorithms And Architectures Of Artificial Intelligence Frontiers In Artificial Intelligence And Applications:

Algorithms and Architectures of Artificial Intelligence Enn Tõugu, Enn Kharal'dovich Tyugu, 2007 This book gives an overview of methods developed in artificial intelligence for search learning problem solving and decision making It gives an overview of algorithms and architectures of artificial intelligence that have reached the degree of maturity when a method can be presented as an algorithm or when a well defined architecture is known e g in neural nets and intelligent agents It can be used as a handbook for a wide audience of application developers who are interested in using artificial intelligence methods in their software products Parts of the text are rather independent so that one can look into the index and go directly to a description of a method presented in the form of an abstract algorithm or an architectural solution The book can be used also as a textbook for a course in applied artificial intelligence Exercises on the subject are added at the end of each chapter Neither programming skills nor specific knowledge in computer science are expected from the reader However some parts of the text will be fully understood by those who know the terminology of computing well , **Information**
