**Acceleration for Gifted Learners, K-5** Joan Franklin Smutny, Sally Y. Walker, Elizabeth A. Meckstroth, 2006-10-19 Smutny has assembled a group of colleagues who bring very practical and useful insights to this issue and suggest practices that will make the use of this important curricular modification justifiable manageable and most of all normal Acceleration is not treated as a strategy of last resort but as a logical and reasonable way to acknowledge and provide for the growth and continuous progress of all children By broadening the idea of acceleration as a way to meet academic emotional and social needs the book turns the concerns about acceleration into strengths Barbara Clark Professor Emeritus California State University Los Angeles A well written extremely useful guide for parents and educators who wish to provide gifted students an opportunity to learn at a pace and level appropriate to their abilities Offers valuable insight on the social and emotional aspects of effective acceleration Jan Davidson President and Cofounder Davidson Institute for Talent Development Coauthor Genius Denied How to Stop Wasting Our Brightest Young Minds Raise the bar on accelerated learning and discover new possibilities that go beyond minimum proficiency Written for K 5 teachers this practical guide corrects misunderstandings in the field of acceleration and provides the tools necessary to effectively determine the most appropriate learning options for gifted students Through real life stories well known authors in gifted education Joan Franklin Smutny Sally Y Walker and Elizabeth A Meckstroth dispel the common myths about acceleration and describe what

it is what forms it takes and what it can do for gifted learners intellectually socially and emotionally Presenting nuts and bolts guidance this valuable resource provides Numerous case studies helpful checklists and reproducible forms Prevailing theories and current research Social emotional aspects of acceleration practices Instructional strategies for implementation in various school settings Learning opportunities for underserved groups such as multicultural and urban students Bibliographies and helpful Web sites Offering a new perspective on how prevailing attitudes have deprived students of opportunities to develop their talents Acceleration for Gifted Learners K 5 directly reflects the 2004 Templeton Report in validating the urgency to meet gifted students needs      Modern Aerodynamic Methods for Direct and Inverse Applications Wilson C. Chin,2019-03-21 A powerful new monograph from an aerodynamicist reviewing modern conventional aerodynamic approaches this volume covers aspects of subsonic transonic and supersonic flow inverse problems shear flow analysis jet engine power addition engine and airframe integration and other areas providing readers with the tools needed to evaluate their own ideas and to implement the newer methods suggested in this book This new book by a prolific fluid dynamicist and mathematician who has published more than twenty research monographs represents not just another contribution to aerodynamics but a book that raises serious questions about traditionally accepted approaches and formulations providing new methods that solve longstanding problems of importance to the industry While both conventional and newer ideas are discussed the presentations are readable and geared to advanced undergraduates with exposure to elementary differential equations and introductory aerodynamics principles Readers are introduced to fundamental algorithms with Fortran source code for basic applications such as subsonic lifting airfoils transonic supercritical flows utilizing mixed differencing models for inviscid shear flow aerodynamics and so on These are models they can extend to include newer effects developed in the second half of the book Many of the newer methods have appeared over the years in various journals and are now presented with deeper perspective and integration This book helps readers approach the literature more critically Rather than simply understanding an approach for instance the powerful type differencing behind transonic analysis or the rationale behind conservative formulations or the use of Euler equation methods for shear flow analysis when they are unnecessary the author guides and motivates the user to ask why and why not and what if And often more powerful methods can be developed using no more than simple mathematical manipulations For example Cauchy Riemann conditions which are powerful tools in subsonic airfoil theory can be readily extended to handle compressible flows with shocks rotational flows and even three dimensional wing flowfields in a variety of applications to produce powerful formulations that address very difficult problems This breakthrough volume is certainly a must have on every engineer s bookshelf      **English Mechanic and World of Science** ,1892      **From American Empire to América Cósmica through Philosophy** Terrance MacMullan,2023-08-08 From American Empire to Am rica C smica through Philosophy Prospero s Reflection envisions a greater ideal American philosophy that integrates philosophies from across the Americas and is set to work resolving the problems that vex the

peoples of the Americas This work contributes to the rapidly growing dialogue on Inter American philosophy with research that adds to the list of philosophical affinities across the Americas However Terrance MacMullan also delves deeply into the points of philosophical contention and misrecognition between Anglo American and Ibero American philosophies by reversing the colonial gaze of the last centuries Following in the tradition of cultural theorists like Enrique Rod and Roberto Fern ndez Retamar who draw on Shakespeare s *The Tempest* as a source of literary metaphors to understand colonialism and imperialism in the Americas MacMullan argues that the United States will never achieve democratic community unless it first contends with the harsh critiques of its culture and philosophies reflected within the works of Latin American philosophers who prophesied and survived the imperialism of the North American Prospero but whose works are still largely unknown and unseen within U S universities

**The Crisis of Marxist Ideology in Eastern Europe** Vladimir Tismaneanu, 2023-03-31 First published in 1988 *The Crisis of Marxist Ideology in Eastern Europe* states that since de Stalinisation began in Eastern Europe the dead hand of institutional Marxism has been eroded by revisionist Marxism with the turn to young Marx and the philosophy of human emancipation to undermine prevailing orthodoxies But this revisionism clung to the old socialist dogmas and refused a total break with the system and the effort eventually failed The result was the emergence of a dissident counterculture rejecting the system entirely Independent social movements such as unofficial peace groups and trade unions like Solidarity have given this counterculture a major role in Eastern Europe whilst the ruling elites have responded with confusion Tismaneanu concludes that the only hope for the anti totalitarian intellectuals of Eastern Europe is to oppose the regimes with non Marxist ideas otherwise they will be permanently reduced to the status of a hopeless albeit heroic minority This book will be of interest to students of economics political science and international relations
