Question 5

The graph above shows the mass of plants from two different species over time. The plants grew while attached to each other. The plants were separated at the time indicated by the vertical line in the graph.

Using template 1, **graph** the predicted shape of the plant-mass lines after separation of the two plants if the plants were in an obligate mutualistic relationship. On template 2, **graph** the predicted shape of the plant-mass lines if the species 2 plant was a parasite of the species 1 plant. **Justify** each of your predictions. (4 points)

TEMPLATE 1: OBLIGATE MUTUALISM

TEMPLATE 2: PARASITISM

	Graph characteristics (1 point each graph; 2 points maximum)	Justification (1 point each box; 2 points maximum)
Obligate Mutualism	Both of the growth curves level off or decline.	- Each species depends on the other for survival. - Without the relationship, both species are harmed.
Parasitism	Species 1 continues to increase while species 2 levels off or declines.	- The parasite requires an association with the host to survive but harms the host. - Without the relationship, the parasite cannot survive while the host continues to grow.

Toxicology in Nonclinical Drug Development Ali S. Faqi, 2024-02-11 Selected for 2025 Doody's Core Titles in Toxicology A Comprehensive Guide to Toxicology in Nonclinical Drug Development Third Edition is a valuable reference providing a complete understanding of all aspects of nonclinical toxicology in pharmaceutical research This updated edition has been expanded and re developed covering a wide range of toxicological issues in small molecules and biologics Topics include ADME in drug discovery pharmacokinetics toxicokinetics formulations and genetic toxicology testing The book has been thoroughly updated throughout to reflect the latest scientific advances and includes new information on antiviral drugs anti diabetic drugs immunotherapy and a discussion on post pandemic drug development challenges and opportunities This is an essential and practical resource for all toxicologists involved in nonclinical testing in industry academic and regulatory settings Provides updated unique content not covered in one comprehensive resource including chapters on stem cells antiviral drugs anti diabetic drugs and immunotherapy Includes the latest international guidelines for nonclinical toxicology in both small and large molecules Incorporates practical examples in order to illustrate day to day activities and expectations associated with working in nonclinical toxicology Serpin Structure and Evolution, 2011-11-07 Serpins are a group of

proteins with similar structures that were first identified as a set of proteins able to inhibit proteases This volume in the Methods in Enzymology series comprehensively covers this topic With an international board of authors this volume covers subjects such as Crystallography of serpins and serpin complexes Serpins as hormone transporters and Production of serpins using cell free systems This volume in the Methods in Enzymology series comprehensively covers the topic of serpins With an international board of authors this volume covers subjects such as Crystallography of serpins and serpin complexes Serpins as hormone transporters and Production of serpins using cell free systems **Virtual Screening** Christoph

Sottriffer, 2011-03-31 Drug discovery is all about finding small molecules that interact in a desired way with larger molecules namely proteins and other macromolecules in the human body If the three dimensional structures of both the small and large molecule are known their interaction can be tested by computer simulation with a reasonable degree of accuracy Alternatively if active ligands are already available molecular similarity searches can be used to find new molecules This virtual screening can even be applied to compounds that have yet to be synthesized as opposed to real screening that requires cost and labor intensive laboratory testing with previously synthesized drug compounds Unique in its focus on the end user this is a real how to book that does not presuppose prior experience in virtual screening or a background in

computational chemistry It is both a desktop reference and practical guide to virtual screening applications in drug discovery offering a comprehensive and up to date overview Clearly divided into four major sections the first provides a detailed description of the methods required for and applied in virtual screening while the second discusses the most important challenges in order to improve the impact and success of this technique The third and fourth practical parts contain practical guidelines and several case studies covering the most important scenarios for new drug discovery accompanied by general guidelines for the entire workflow of virtual screening studies Throughout the text medicinal chemists from academia as well as from large and small pharmaceutical companies report on their experience and pass on priceless practical advice on how to make best use of these powerful methods

Protein-Ligand Interactions Holger Gohlke, 2012-04-06 Innovative and forward looking this volume focuses on recent achievements in this rapidly progressing field and looks at future potential for development The first part provides a basic understanding of the factors governing protein ligand interactions followed by a comparison of key experimental methods calorimetry surface plasmon resonance NMR used in generating interaction data The second half of the book is devoted to insilico methods of modeling and predicting molecular recognition and binding ranging from first principles based to approximate ones Here as elsewhere in the book emphasis is placed on novel approaches and recent improvements to established methods The final part looks at unresolved challenges and the strategies to address them With the content relevant for all drug classes and therapeutic fields this is an inspiring and often consulted guide to the complexity of protein ligand interaction modeling and analysis for both novices and experts **A**

Comprehensive Guide to Toxicology in Preclinical Drug Development Ali S. Faqi, 2012-10-18 A Comprehensive Guide to Toxicology in Preclinical Drug Development is a resource for toxicologists in industry and regulatory settings as well as directors working in contract resource organizations who need a thorough understanding of the drug development process Incorporating real life case studies and examples the book is a practical guide that outlines day to day activities and experiences in preclinical toxicology This multi contributed reference provides a detailed picture of the complex and highly interrelated activities of preclinical toxicology in both small molecules and biologics The book discusses discovery toxicology and the international guidelines for safety evaluation and presents traditional and nontraditional toxicology models Chapters cover development of vaccines oncology drugs botanic drugs monoclonal antibodies and more as well as study development and personnel the role of imaging in preclinical evaluation and supporting materials for IND applications By incorporating the latest research in this area and featuring practical scenarios this reference is a complete and actionable guide to all aspects of preclinical drug testing Chapters written by world renowned contributors who are experts in their fields Includes the latest research in preclinical drug testing and international guidelines Covers preclinical toxicology in small molecules and biologics in one single source
