Data Retention & Sharing

- It is the responsibility of researchers to give editors access to their information at any point in the publication process, even after publication.
- Authors should keep their data for at least five years after the publication date.

Plagiarism & Self-Plagiarism

- **Plagiarism** is expected that researchers will give proper credit for their research and not present the work of others as their own.
 - **Self-plagiarism:** Researchers should not present their own past publication as new scholarship.

- **Conflict of Interest**
 - It is best to note any activities or relationships that could appear to constitute a conflict of interest, even if the researcher doesn't believe they exist.

Writing Clearly & Concisely

Headings

- Headings show how:
 - The parts of your paper work together
 - Your paper is organized by indicating which parts are equally important and how each part relates to the others.
- APA uses five heading formats:

Centered, Bold, Title Case Heading

Flush Left, Bold, Title Case Heading

Flush Left, Bold Italic, Title Case Heading

Indented, Bold, Title Case Heading, Ending With a Period.

Indented, Bold Italic, Title Case Heading, Ending With a Period

Organizing Headings

- Do not use a heading for the introduction of your paper.
- Use the same heading level for topics of equal importance.
- Be sure that each heading is followed by at least two sub-headings or none at all. Do not divide your topic or subtopic into a single entry.
- Do not label headings with numbers or letters, or in sentence form.

Reducing Bias in Language

- Use the appropriate level of specificity.
 - EX: Using the word *man* to represent humanity is not as accurate as using the phrase *individuals* or *people*.
 - Differences of any kind should be described only when relevant.
- Be sensitive to labels.
 - Use the singular they for a person whose name they do not know.
 - Avoid using adjectives to name or label people (e.g., *the poor*, *the poor*).
 - Call people what they call themselves.
 - Person-first language (e.g., *a person with paraphilia*), identity-first language (e.g., *an autistic person*), or both may be acceptable.
- Avoid false homonyms.
 - Use parallel designations for groups (e.g., *comparative gay men and straight men* or *lesbians*, not *the general public*).
 - When referring to multiple social groups, don't put groups in order of social dominance by default (e.g., *men and women*, *white Americans and racial minorities*).
- **Reducing Bias by Topic**
 - **Gender:** Cultural, refers to a person's role, not their biological sex.
 - Use the singular they for individuals whose identified genders are not known.
 - Do not use terms that imply binaries (e.g., *opposite genders*).
 - **Social relationships:** A pattern of attraction, behavior, identity, and social contact—different from sexual preference.
