Birkhauser Construction Manual:

Facade Construction Manual Thomas Herzog,Roland Krippner,Werner Lang,2012-12-10 Facades they are the first feature of a building to be noticed they determine its distinctive appearance and are often the subject of controversial debate This new first edition of the Facade Construction Manual provides a systematic survey of contemporary expertise in the application of new materials and energy efficient technologies in facade design and represents an invaluable addition to our series of Construction Manuals It surveys the facade design requirements made by various types of buildings as well as the most important materials from natural stone through to synthetics and documents a diversity of construction forms for a wide range of building types Over 100 international case studies in large scale detailed drawings are presented in the comprehensive project section

Architectural Detailing Patrick Rand,Jason Miller,Edward Allen,2024-09-24 The industry standard guide to designing well performing buildings Aesthetics are a vital part of good design Great design emerges from a deep understanding of the functionality and constructability of details Good details provide clear complete and correct information to the wide variety of users that need them Architects guide a project from design idea to buildable reality by working with other building industry professionals and creating a set of details that show how things are put together Architectural Detailing systematically describes the principles for designing good architectural details Using patterns that demonstrate best practices and consistent approaches to design detailing this book teaches why detailing is important what factors shape detailing issues and how to detail a building that meets or exceeds performance requirements Extensive illustrations demonstrate how to design building details that will not leak water or air will control the flow of heat and water vapor will adjust to all kinds of movement and will be easy to construct This fourth edition has been updated to conform to the latest International Building Codes and International Energy Conservation Code requirements and incorporates current knowledge about new material and construction technology including Expanded patterns for sustainability high performance architecture and resilience Examples using panelized or modularized prefabricated building assemblies Complex case studies demonstrating the detailing design process for energy efficient structures Design detailing for maintenance and management of sensitive or weak spots in a building assembly Architectural Detailing helps you bring a building together with a well detailed design that communicates effectively at all levels of the construction process

Basics Timber Construction Ludwig Steiger,2020-09-21 Timber is one of the most elementary and oldest building materials used by mankind and has still not lost any of its attractiveness and topicality In many cultural spheres and climate zones the primary construction methods of domestic architecture include both masonry construction and timber construction However this living lightweight and easy to work material has specific characteristics that impact on the way it is used in construction in different ways compared to other building materials In order to develop high quality designs that suit the material architects need to be familiar with the specific characteristics of this building material and with the rules governing timber construction The new edition of the

successful Basics Timber Construction volume lists the most common solid timber construction systems including that using solid timber wall elements as well as the rules applications and the relevant details *Materials* Julia McMorrough,2006

Publisher description **Basics Steel Construction** Katrin Hanses,2017-05-22 Buildings with wide spans such as industrial plants and warehouses are usually built with steel The architect must understand the specific material properties and requirements of steel as a construction material including its static properties which influence dimensioning and profile selection Step by step Basics Steel Construction imparts the basic understanding needed for planning with steel as a building material **The Architecture Reference & Specification Book updated & revised** Julia McMorrough,2018-01-09 Most architectural standards references contain thousands of pages of details overwhelmingly more than architects need to know to know on any given day The updated and revised edition of Architecture Reference Specification contains vital information that s essential to planning and executing architectural projects of all shapes and sizes all in a format that is small enough to carry anywhere It distills the data provided in standard architectural volumes and is an easy to use reference for the most indispensable and most requested types of architectural information **Basics Climate-Smart Design and Construction** Bert Bielefeld,2024-06-04 The construction sector currently accounts for a high proportion of CO2 emissions and gray energy use This will have to change fundamentally if we are to prevent catastrophic climate change and make urban planning and construction fit for the future In addition to a paradigm shift in how architects work we need to rethink how they are trained in higher education Based on a lifecycle approach and an awareness of resource consumption this volume in the Basics series explains a wide range of climate friendly concepts in an easy to understand way inspiring readers to take a closer look at solutions and new approaches in their daily practice The key factors involved in the various planning stages of buildings are presented and placed in the context of the overall planning Explains a range of current sustainability concepts Foundational knowledge for all students of architecture Interdisciplinary and networked consideration of challenges and solutions in the area of climate protection *Basics Facade Apertures* Roland Krippner,Florian Musso,2017-05-22 Facade apertures represent the realm of the exterior wall or facade which establishes the connection between inside and out and makes it possible to illuminate and ventilate the spaces behind it This volume deals with the various forms of openings such as doors windows ventilation elements and fixed glass panes and their materialization which also varies according to function special attention is given to the subject of edges Themes Types and positions of openings Technical requirements Construction types Connections edges **Basics Concrete Construction** Katrin Hanses,2017-05-22 Concrete is the modern construction material that has helped shape the fundamental static principles of structural load bearing Similar to masonry concrete effectively transmits pressure downward but its weak point is tractive forces Concrete has also enabled freer use of architectonic forms This title imparts the basic knowledge every architect needs to master for planning reinforced and non reinforced concrete construction *Material Architecture* John Fernandez,2012-08-21 Composed of a series of essays this book deals with the

broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them The book is organized into three sections Time looks at how the materials used in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design Materials covers all five material families metals polymers ceramics composites and natural materials giving in depth information on their properties behavior origins and uses in design It also introduces a review of the cutting edge research for each family Systems outlines the technical design orientated research that uncovers how new architectural assemblies can be designed and engineered All of this practical advice is given along with many real case examples illustrating how this knowledge and information has been and can be used in architectural design
