Clé Lesger

Algemeen Uitbreidingsplan Amsterdam 50 Jaar:

Algemeen uitbreidingsplan Amsterdam 50 jaar H. Hellinga, 1985 Gedocumenteerde studies en persoonlijke beschouwingen over de stedenbouwkundige ontwikkeling in Amsterdam tussen 1935-1985 **Amsterdam Human Capital** Sako Musterd, Willem Salet, 2025-10-01 The familiar shape of western cities is changing dramatically For long times the urban core was taken for granted as the focal point for international contacts and day to day activities in the region Currently the urban scope is transforming into multi centred forms at metropolitan scale The transition is not just a matter of spatial form it is reflecting social economic and cultural processes The question is what new identities may develop in such changing historical conditions of space and place This book is a first attempt to analyse the process of urban transformation in an integral way The focus is on the region of Amsterdam All contributions are written by senior researchers of the Amsterdam studycentre for the Metropolitan Environment AME AME is the interdisciplinary urban research institute of the Universiteit van Amsterdam As the urban research institute at the Universiteit van Amsterdam the Amsterdam studycentre for the Metropolitan Environment AME analyses the economic social and cultural aspects of this spatial transformation usually in international comparative research All contributions to this book are written by senior researchers of AME in an attempt to analyse in an integral way the present and future dilemmas out of the historical growth paths of this dynamic city *The Grove Encyclopedia of Medieval Art and Architecture* Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture Population Forecasting 1895-1945 H.A. de Gans, 2012-12-06 Authors scholars and scientists whose mother tongue is not one of the major languages of international communication are seriously disadvantaged Some individuals such as Joseph Conrad or Vladimir Nabokov have overcome that handicap brilliantly Others learn to live with it they can express themselves sufficiently lucidly in a second language to make their voice heard internationally At least when they have something original or striking to say they will be certain to reach their peers Most scientists and scholars fall into that category Others again have to wait until their work has been translated before its value is recognised This may apply even to those whose mother tongue is widely read The writings of Frenchmen Lyotard Derrida Baudrillard or Foucault on post modernism on language discourse and power for example had tremendous world wide impact only after English translations appeared on the market De Gans study of the development of population forecasting in The Netherlands is another striking illustration of the effects a language barrier may have He demonstrates convincingly that although a possibly somewhat awkward Dutchman named Wiebols was a pioneer of modern cohort component demographic forecasting he never received international recognition for this In his thesis of 1925 Wiebols

employed the newest instruments of demographic analysis in improving forecasting methodology *Compact Cities and Sustainable Urban Development* Gert de Roo, Donald Miller, 2019-05-24 This title was first published in 2000 Encouraging even requiring higher density urban development is a major policy in the European Community and of Agenda 21 and a central principle of growth management programmes used by cities around the world This work takes a critical look at a number of claims made by proponents of this initiative seeking to answer whether indeed this strategy controls the spread of urban suburbs into open lands is acceptable to residents reduces trip lengths and encourages use of public transit improves efficiency in providing urban infrastructure and services and results in environmental improvements supporting higher quality of life in cities

Amsterdam's Canal District Jan Nijman, 2020-09-10 In terms of design scale and blending of ecological and aesthetic function Amsterdam's seventeenth century Canal District is a European marvel Its survival for four centuries is a testament to its ingenuity reflected in its designation as a UNESCO World Heritage Site in 2010 The Canal District today is an extraordinary example of resilient historic design and cultural heritage in a living city but it is not without present day challenges in recent years its urban ecology has become subject to severe pressures of global tourism and supergentrification This edited volume brings together seventeen reputable scholars to debate questions about the origins evolution and future of the Canal District With these differing approaches and perspectives on the Canal District the contributions render a collection where the whole is much more than the sum of the parts The book breaks new ground in our understanding of the District's historic design its evolution over four hundred years and the fundamental issues in future facing strategies and policies While the main focus is clearly on Amsterdam the discussions in this collection have an important bearing on broader questions of urban historic preservation elsewhere and on questions about enduring urban design

Gids voor moderne architectuur in Nederland Paul Groenendijk, Piet Vollaard, Piet Rook, 1998 Reis gids voor moderne Nederlandse architectuur waarin ruim 700 objecten worden afgebeeld en beknopt beschreven

Het winkellandschap van Amsterdam Clé Lesger, 2013 Overhangende luifels uithangborden uitstallingen op de stoep en sobere interieurs waren ooit typerend voor de winkels in Amsterdam Vanaf het midden van de zestiende eeuw hebben de puien etalages en interieurs van de winkels echter grote veranderingen ondergaan Cl Lesger beschrijft deze in samenhang met ontwikkelingen in bouwkunde en architectuur de opkomst van warenhuizen en supermarkten en veranderingen in verlichting en glasfabricage Ook de samenstelling koopkracht en smaak van het winkelend publiek spelen een rol De vele afbeeldingen maken de veranderingen zichtbaar Daarnaast besteedt Lesger veel aandacht aan de locatie van winkels Winkels zijn niet willekeurig verdeeld over de stad maar verbonden met de structuur van het stratennetwerk die is ontstaan tijdens stadsuitbreidingen en andere grote ingrepen in het stedelijk landschap Pas toen er winkelcentra werden gebouwd in buitenwijken werd het patroon van winkelstraten doorbroken In de vooroorlogse delen van Amsterdam is het oude bewinkelingspatroon wel blijven bestaan

Metropolis , 2020-12-07 *Gids voor moderne architectuur in Amsterdam /*

Guide to Modern Architecture in Amsterdam Paul Groenendijk, Piet Vollaard, Piet Rook, 1996 Gebouwen en stedenbouwkundige projecten in Amsterdam in de periode van 1900 tot heden
