Alimentacion Como Medicina Spanish:

The Social Metabolism of Spanish Agriculture, 1900-2008 Manuel González de Molina, David Soto Fernández, Gloria Guzmán Casado, Juan Infante-Amate, Eduardo Aguilera Fernández, Jaime Vila Traver, Roberto García Ruiz, 2019-11-12 This open access book provides a panoramic view of the evolution of Spanish agriculture from 1900 to the present offering a more diverse picture to the complex and multidimensional reality of agrarian production With a clear transdisciplinary ambition the book applies an original and innovative theoretical and methodological tool termed Agrarian Social Metabolism combining Social Metabolism with an agroecological perspective This integrative analysis is especially interesting for environmental scientists and policy makers being the best way to design sustainable agroecosystems and public policies capable of moving us towards a more sustainable food system Spanish agricultural production has experienced impressive growth during the 20th century which has allowed it to ensure the supply of food to the population and even to transform some crops into important chapters in foreign trade However this growth has had its negative side since it was based on the injection of large amounts of external energy on the destruction of employment and the loss of profitability of agricultural activity But perhaps the most serious part is the strong impact of the current industrialised agriculture model on Spanish agroecosystems exposed to the overexploitation of hydric resources pollution of the water by nitrates and pesticides high erosion rates and an alarming loss of biodiversity damage which in the immediate future will end up reducing production capacity *National Library of Medicine Catalog* National Library of Medicine (U.S.), 1960 *Franco's Famine* Miguel Ángel del Arco Blanco, Peter Anderson, 2021-09-09 At least 200 000 people died from hunger or malnutrition related diseases in Spain during the 1940s This book provides a political explanation for the famine and brings together a broad range of academics based in Spain the United Kingdom the United States and Australia to achieve this Topics include the political causes of the famine the physical and social consequences the ways Spaniards tried to survive the regime's reluctance to accept international relief the politics of cooking at a time of famine and the memory of the famine The volume challenges the silence and misrepresentation that still surround the famine It reveals the reality of how people perished in Spain because the Francoist authorities instituted a policy of food self sufficiency or autarky a system of price regulation which placed restrictions on transport as well as food sales The contributors trace the massive decline in food production which followed the hoarding which took place on an enormous scale and the vast and deeply iniquitous black market that subsequently flourished at a time when salaries plunged to 50% below their levels in 1936 all contributing factors in the large scale atrocity explored fully here for the first time *The Oxford Handbook of Latin American History* Jose C. Moya, 2010-11-05 The decades since the 1980s have witnessed an unprecedented surge in research about Latin American history This much needed volume brings together original essays by renowned scholars to provide the first comprehensive assessment of this burgeoning literature The seventeen original essays in *The Oxford Handbook of Latin American History*

survey the recent historiography of the colonial era independence movements and postcolonial periods and span Mexico Spanish South America and Brazil They begin by questioning the limitations and meaning of Latin America as a conceptual organization of space within the Americas and how the region became excluded from broader studies of the Western hemisphere Subsequent essays address indigenous peoples of the region rural and urban history slavery and race African European and Asian immigration labor gender and sexuality religion family and childhood economics politics and disease and medicine In so doing they bring together traditional approaches to politics and power while examining the quotidian concerns of workers women and children peasants and racial and ethnic minorities This volume provides the most complete state of the field and is an indispensable resource for scholars and students of Latin America **Biomedical Serials,**

1950-60 National Library of Medicine (U.S.),1962 A dictionary, Spanish and English, and English and Spanish Hipólito San Joseph Giral del Pino,1763 **Conquista y comida** ,1996 *Eating Disorders in the Mediterranean Area* Giovanni Maria Ruggiero,2003 In this book an international group of authors explores the extent of and the socio cultural factors underlying the ascendancy of eating disorders in some countries of the Mediterranean area in our own time The authors express their local observations and struggles in an effort to map the impact of culture on the development of eating disorders The topics reviewed echo back to each other and underscore the complexity of defining measuring and possibly even changing culture The book takes a transcultural view which is both trans and cultural Realms transverse the academic terrain with chapters that pull on history geography biology and literature to set the stage for a review of cultural causes with culture being the political commercial and treatment settings potential eating disordered individuals find themselves in The chapters demonstrate how control the key cognitive construct of eating disorders is impacted by the internal and external environment of the eating disordered individual And if control is the bridge shame is the dark sea that one struggles to avoid Biological and psychological data from humans and animals is offered in an attempt to understand how efforts to maintain an honourable social ranking impacts food and body shape choices **Biomedical Serials, 1950-1960** National Library of Medicine (U.S.),1962 Public Health Service Publication United States.
