A Decade of Disruption Garrett Peck, 2020-06-02 An eye opening history evoking the disruptive first decade of the twenty first century in America Dubya The 9 11 terrorist attacks Enron and WorldCom The Iraq War Hurricane Katrina The disruptive nature of the internet An anxious aging population redefining retirement The gay community demanding full civil rights A society becoming ever more brown The housing bubble and the Great Recession The historic election of Barack Obama and the angry Tea Party reaction The United States experienced a turbulent first decade of the 21st century tumultuous years of economic crises social and technological change and war This lost decade 2000 2010 was bookended by two financial crises the dot com meltdown followed by the Great Recession Banks deemed too big to fail were rescued when the federal government bailed them out but meanwhile millions lost their homes to foreclosure and witnessed the wipeout of their retirement savings The fallout from the Great Recession led to the hyper polarized society of the years that followed when populists ran amok on both the left and the right and Americans divided into two distinct tribes A Decade of Disruption is a timely re examination of the recent past that reveals how we ve arrived at our current era of cultural division

undermine the power of capital producing an alternative symbolic economy Strangelove contends that the Internet breaks with the capitalist logic of commodification and that while television produces a passive consumer audience Internet audiences are more active creative and subversive Writers activists and artists on the Internet undermine commercial media and its management of consumer behaviour a behaviour that is challenged by the Web s tendency toward the disintegration of intellectual property rights Case studies describe the invention of new meaning given to cultural and consumer icons like Barbie and McDonald s and explore how novel modes of online news production alter the representation of the world as it is produced by the mainstream corporate press In the course of exploring new media The Empire of Mind also makes apparent that digital piracy will not be eliminated The Internet community effectively converts private property into public thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value Much to the dismay of the corporate sector online communities are disinterested in the ethics of private property In fact the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production **All**
