One Right Answer, Infinite Wrong Answers: Why Humanity Is Addicted to Being Wrong David Sinclair, 2021-07-27 This is a book about the one objective truth of existence and the countless subjective falsehoods accepted as true by the vast majority of humanity This book focuses especially on New Age guru Ken Wilber s fallacious system known

as Integral Theory his theory of everything where he attempts to place a wide diversity of mystical theories and the teachings of various gurus into a single framework that supposedly explains everything Wilber's system is best summed up in his statement I have one major rule Everybody is right More specifically everybody including me has some important pieces of truth and all of those pieces need to be honored cherished and included in a more gracious spacious and compassionate embrace It is exactly this sentiment that underlies the New Age hegemony of relativism and subjectivism of everyone having their own experiences their own path their own truth In such a system it becomes impossible for people to reach the one absolute objective truth of existence which grounds everything In order to reach the Truth the task is not to pretend to people that they are all right but to show where they have gone wrong where they have strayed from reason and logic where they have succumbed to irrationalism via emotionalism sensory empiricism faith and mysticism Wilber adopts a fully irrationalist stance when he claims that the enlightened are what he calls trans rational i.e. they have somehow transcended reason and logic and thus reached the zone according to Wilber where they can apprehend Absolute Reality In fact Absolute Reality insofar as it is intelligible is nothing but the expression of the Principle of Sufficient Reason and its corollary Occam's razor How do we eliminate the infinite wrong answers to existence and reach the one infallible right answer to existence It's simplicity itself The answer to existence is the simplest and most rational possible Any answer that is not rational is irrational hence false Any answer that is not the simplest is wrong because reality would never privilege complexity over simplicity Reality necessarily follows the path of least resistance the most economic path It does not know how to introduce superfluous needless and pointless complexity You will never understand the answer to existence if the answer you support is against rationalism and against rational simplicity
