

GCSE PE NEA (Coursework): Analysis 1,2,3,4 Evaluation 5,6,7

The information below is to help you format and structure the **seventh** section of the NEA (coursework). Please note that you should use your own wording as much as possible and research online for as much information as possible. Lastly, read the exemplar to support your understanding.

Section 7 - Theoretical Cause pdf

Section 7: Theoretical Cause

This section requires you to choose a theoretical element from the AQA GCSE PE specification. This theoretical element must be presented as a cause to your weakness, outlined in section 4 of your analysis (**SKILL WEAKNESS**). You will need to outline your knowledge of this **theoretical link (AO1)** and apply to your **skill weakness (AO2)**. Then you will need to present corrections to help improve your skill weakness. These strategies will require you to review information and then bring it together to form a conclusion, drawing on evidence such as **strengths, weaknesses, alternatives and relevant data (AO3)**. The two most relevant theories that can be applied generally are the **information processing model** and the **inverted-U theory**. The table below outlines will get you to explore which one applies most to your skill weakness identified in section 4.

Theoretical Cause	Corrections
Information processing - input, decision making, output and feedback Research: Information processing model - Performance feedback in sport - Eduqas - GCSE Physical Education Revision Video: GCSE PE - INFORMATION PROCESSING MODEL - (Skill Acquisition & Psychology) - (Skill Acquisition 8.4) Lesson: Lesson 3: Information Processing Model Link between skill weakness(es) and theoretical cause Re-read section 4 of your analysis. Can you apply your skill weakness to any of the following issues? • Poor selective attention? An inability to respond or react to a stimulus efficiently? • Poor decision making? An inability to execute the correct pass, pass. Are you being called up for footwork violations etc.? • Is your output (skill performance) poor or too slow? • Are you unable to respond to feedback (intrinsic or extrinsic) effectively? If you've answered yes to any of these questions then the information processing model might be your theoretical cause. Now study the corrections to see if they might help improve your skill performance.	Strategies have been proposed for each part of the information processing model below: • Input: Strategies to improve selective attention – blocking out everything, eg noise / other visual stimuli / other than key focus points above, ie the ball • Decision making: Strategies to improve long term memory by storing more motor programmes (Repetition, Use Memory Aids, Mental rehearsal etc.) • Output: Strategies to speed up the process of sending information (nerve impulses) to muscles – (Use a Step-by-step Approach and Repetition of Skills, Use Technology Tools) • Feedback: Strategies to increase the receiver feedback via self (intrinsic / kinaesthetic) and / or others (extrinsic) – did you hit ball / how did it feel / Where did it go / did you misread the ball - Types of feedback - intrinsic and extrinsic - Performance feedback in sport - Eduqas - GCSE Physical Education Revision All corrections should improve the qualities of decision making in sport.
Inverted-U theory - The relationship between arousal level and performance level, e.g. when under aroused, performance level is low/under or over arousal causing low performance levels. 	Strategies should focus on how arousal can be controlled using stress management techniques before or during a sporting performance: deep breathing, mental rehearsal/visualisation/imagery, positive self-talk. Preparation techniques - breathing control and self talk - Mental preparation - AQA - GCSE Physical Education Revision - AQA - BBC Bitesize Visualisation and mental rehearsal - why does it help? - Mental preparation - AQA - GCSE Physical Education Revision - AQA - BBC Bitesize
