| Breast composition       | a. The breasts are almost entirely fatty<br>b. There are scattered areas of fibroglandular density<br>c. The breasts are heterogeneously dense, which may obscure small masses<br>d. The breasts are extremely dense, which lowers the sensitivity of mammography |                                                                                                                           |
