Acsm Resource Manual 7th Edition:

ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription David P. Swain, ACSM, Clinton A. Brawner, 2012-12-26 ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription was created as a complement to ACSM's Guidelines for Exercise Testing and Prescription and elaborates on all major aspects of preventative rehabilitation and fitness programs and the major position stands of the ACSM. The 7th edition provides information necessary to address the knowledge, skills, and abilities set forth in the new edition of Guidelines and explains the science behind the exercise testing and prescription. ACSM's Resource Manual is a comprehensive resource for those working in the fitness and clinical exercise fields as well as those in academic training.

ACSM's Guidelines for Exercise Testing and Prescription American College of Sports Medicine, 2014 The flagship title of the certification suite from the American College of Sports Medicine, ACSM's Guidelines for Exercise Testing and Prescription is a handbook that delivers scientifically based standards on exercise testing and prescription to the certification candidate, the professional, and the student. The 9th edition focuses on evidence-based recommendations that reflect the latest research and clinical information. This manual is an essential resource for any health, fitness, and clinical exercise professional: physician, nurse, physician assistant, physical and occupational therapist, dietitian, and health care administrator. This manual gives succinct summaries of recommended procedures for exercise testing and exercise prescription in healthy and diseased patients.

ACSM's Resources for the Health Fitness Specialist American College of Sports Medicine, 2013-03-07 This valuable new resource is specifically designed for candidates for the ACSM's Certified Health Fitness Specialist (HFS) and those personal trainers wanting to take their knowledge to the next level. It contains the latest material on health and fitness written by the entity setting the standard for scientifically based practice. The American College of Sports Medicine is the largest sports medicine and exercise science organization in the world. More than 45,000 members are dedicated to advancing and integrating scientific research to provide educational and practical applications of exercise science and sports medicine.

ACSM's Fitness Assessment Manual American College of Sports Medicine, 2021-05-18 Published by the American College of Sports Medicine, ACSM's Fitness Assessment Manual builds on the standards established in ACSM's Guidelines for Exercise Testing and Prescription, 11th Edition. With a focus on assessment, this new 6th edition is organized by component of fitness: body composition, cardiorespiratory fitness, muscular fitness, flexibility, and by type of testing: maximal and submaximal exercise testing, ECG, and metabolic calculations. Updated coverage throughout in a user-friendly format makes this an essential resource for those studying to enter the fitness and rehabilitation fields as well as those already working who need to align their practice to industry standards.
