Parliament. House of Commons. Innovation, Universities, Science and Skills Committee,2009 Engineering is a critical component of the national economy and of society in general The Committee is convinced that the strength of the UK s engineering base means that the UK can play a major part in solving global

problems such as climate change food and water supply energy security and economic instability Engineering involves skills higher education and innovation and encompasses research and development design production distribution and services The Committee takes a case study approach in this report exploring key themes through the lenses of nuclear engineering plastic electronics engineering geo engineering and engineering in Government It notes concerns about the UK's capacity to deliver a new generation of nuclear power stations and there are significant skills shortages The plastic electronics case study highlighted the potential opportunity afforded to the UK through the support of emerging innovative industries but we are likely to miss out on the economic return associated with translating the findings of research into commercialised technologies The global nature of many engineering challenges was highlighted during the discussion of geo engineering research and it is essential that the views of the science engineering and social science communities be seen as complementary sources of expertise in policy making Engineering in government demonstrated that engineering advice and scientific advice offer different things and that this should be recognised in the policy process Government does not have sufficient in house engineering expertise and engineering advice is frequently not sought early enough during policy formulation for example on eco towns renewable energy and large IT projects There should be a greater level of engineering expertise in the generalist civil service as well as more engineering policy specialists
