Methodological Practices in Social Movement Research Donatella Della Porta, 2014

Social movement studies have grown enormously in the last few decades, spreading from sociology and political science to other fields of knowledge as varied as geography, history, anthropology, psychology, economics, law, and others. With the growing interest in the field, there has been also an increasing need for methodological guidance for empirical research. This volume aims at addressing this need by introducing main methods of data collection and data analysis as they have been used in past research on social movements. The book emphasises a practical approach, presenting in each chapter specific discussions on the main steps of research using a certain method, from research design to data collection and the use of information. In doing so, dilemmas and choices are presented and illustrated within chapters following the same systemic approach.
